(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math (Bankability Prep) Grade Level: 9-12

Student Name: Grace Dittman

Domain I: Planning and Preparation
PA Standard(s): • PA Career Education and Work Standard 13.3.11.B: Analyze consumer and personal finance skills, including income, account balances, and deciding what is affordable, needed for independent living. • Functional Math: Compare numbers using greater than and less than; compare prices to available funds. • Note: verify alignment with individual students' IEP/PASA goals for functional math.
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do we tell which number is greater than or less than another? • What is income, and where does it come from? • How do we decide what we can afford to buy?
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will identify which number is greater than or less than another during the 'What's the Number Wednesday' warm-up. • Students will explain that income is money earned, and connect it to getting paid at their work ed jobs. • Students will log into their Bankability accounts and record how much money they have. • Students will decide whether they will shop on Friday (yes/no). • Students will compare the prices on the item list to their available money and circle what they can

afford and want to buy.

Assessment Evidence/Level of Learning
Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:

- Accuracy identifying greater than/less than numbers during the warm-up
- Participation in the income video discussion
- Completed Fun Friday form: account amount recorded, yes/no shopping choice marked, items circled
- Whether the items circled fit within the amount of money the student has

Differentiated Instruction:
Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's.
Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted.

- Video from the Bankability website presents income visually and in simple terms
- Income is connected to students' own experience: getting paid at their work ed jobs
- Fun Friday form and item list provide a structured, concrete way to make a spending decision
- Adult support available for logging in, reading the account amount, and comparing it to prices
- Visual schedule and consistent morning routine maintained for predictability

Domain II: Classroom Environment:
Describe Classroom/Behavior Management Plan & Routines

- Visual schedule displayed showing today's activities
- Usual morning routine maintained
- Clear verbal and visual cues signal transitions between the warm-up, video, and Fun Friday form
- Students reminded that there is no class Thursday, which is why the Friday form is completed today

Domain III: Instruction

Activate Prior Knowledge/Motivation:
- Usual morning routine.
- Warm-up: 'What's the Number Wednesday.' Numbers are shown on the board, and students tell which number is greater than or less than the other.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

- Visual schedule (board/projector)
- 'What's the Number Wednesday' numbers on the board
- Video on income from the Bankability website
- Devices with Bankability access
- Fun Friday form for Bankability
- List of items students can buy, with prices
- Pencils

Vocabulary (New or Review):

- Income — money you earn, such as pay from a job
- Greater than / less than — review
- Balance — the amount of money in an account (review)
- Afford — having enough money to buy something (review)

Sequence of the Lesson:

- Bankability lesson: watch the video from the website about income. Discuss what income is. Explain that when students go to work (they are in work ed), they get paid, and that pay is their income.
- Fun Friday form: because there is no class Thursday, students fill out their Friday Bankability form today. Students go into their Bankability accounts and write down how much money they have, then choose yes or no for whether they will be shopping on Friday.
- Students look at the list of items they can buy, decide whether they have enough money, and circle what they want to buy.

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- Briefly recap: what is income, and are you shopping on Friday?
- Remind students there is no class Thursday and that the Bankability store is Friday.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?

4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
