| | |
|---|---|
| • **Both groups:** The finished food (chicken in the crockpot, noodles, and mac and cheese) shows whether the steps were followed. | similar to the Measurement Monday warm-up, so students practice a skill they have seen.<br>• **Both groups:** Adult support is given as each student needs it.<br>• **Reinforcement:** Fake money is earned for participating and helping a friend.<br>• **IEP/504:** Accommodations in each student's IEP/504 plan will be followed. |

**Domain II: Classroom Environment**:

Describe Classroom/Behavior Management Plan & Routines

- Students follow the same classroom routines and expectations they already know, plus the kitchen safety rules reviewed before cooking.
- Group 1 has printed Symbol Stix directions to follow, one step at a time.
- Adults supervise all use of the stove and crockpot.
- Group 2 takes a snack/leisure break first, then starts cooking.
- Students earn fake money for participating and helping a friend.

**Domain III: Instruction**

**Activate Prior Knowledge/Motivation:**

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Yesterday's Measurement Monday warm-up gave students practice measuring amounts in cups, and today they use those measurements to cook. The Symbol Stix directions use images students already know from their talkers. Cooking a real meal motivates students and connects math to everyday life.

**Materials Needed:**

Printed Symbol Stix directions, chicken, seasoning, crockpot, pot, stove, water, noodles, mac and cheese ingredients, measuring cups, spoons, bowls, students' AAC devices, teacher AAC device, fake money, timer, snack and leisure items

**Vocabulary (New or Review):**

Cup; measure; amount; boil; stir; chicken; seasoning; noodles; mac and cheese

**Sequence of the Lesson:**

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their

performance? Include relevant vocabulary. Use bullets to sequence your lesson.

**Group 1 — cooking**

- Students use the printed Symbol Stix directions, which match the symbols on their talkers.
- Students put the chicken and seasoning in the crockpot, following the directions.
- Students put water on the stove to boil for the noodles.
- If there is time, students boil the noodles.
- I model my AAC device while giving directions and give help as each student needs it.
- I hand out fake money for participating and helping a friend.

**Group 2 — begins at 9:52**

- Students grab their materials.
- Snack and leisure break until 10:08 (timer on the board).
- Students make the rest of the mac and cheese using measurements, similar to the Measurement Monday warm-up.
- Students measure the amounts in cups, with adult support as needed.
- I hand out fake money for participating and helping a friend.

**Closure**: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Group 1: Students and I look at the finished steps on the Symbol Stix directions. I use my AAC device to ask students to share one thing they did.
Group 2: I ask students to say or show one measurement they used and one thing they did to help make the mac and cheese.
Connection to Next Lesson: Students continue practicing measurements and following directions, and use their fake money to shop at the end of the week.

## Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

**Domain I Planning and Preparation**

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

**Domain II Classroom Environment**

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

**Domain III Instructional Delivery**

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.

8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

**Overall Assessment**

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
