Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation
PA Standard(s): • Functional Math: Count and sequence numbers 1-10 and 1-39; read and interpret a pictograph; find the mean, median, and mode of a data set. • PA Career Education and Work Standard 13.3.11.B: Apply functional math skills needed for independent living and data interpretation. • Note: verify alignment with individual students' IEP/PASA goals for functional math and AAC communication.
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do we count and sequence numbers? • How can we read a pictograph to understand data? • How do we find the mean, median, and mode of a data set, and what do they tell us?
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Group 1: Students will complete a dot-to-dot drawing by counting from 1 to 10 in sequence. • Group 1: Students will read a pictograph, count the number of symbols in each row, and write down the total. • Group 2: Students will complete a dot-to-dot drawing by sequencing numbers from 1 to 39. • Group 2: Students will answer questions about number relationships (e.g., 'What is 5 more than 25?'). • Group 2: Students will find the mean, median, and mode of a data set shown on a graph.

Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • Group 1: accuracy completing the 1-10 dot-to-dot drawing • Group 1: accuracy counting symbols on the pictograph practice sheet • Group 2: accuracy completing the 1-39 dot-to-dot drawing • Group 2: accuracy answering number-relationship questions • Group 2: accuracy finding mean, median, and mode	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • Group 1: lower number range (1-10) and a concrete, visual counting task matched to their level; AAC device support available • Group 2: higher number range (1-39) with the added challenge of number-relationship questions, matched to their higher independence level • Teacher models the first mean/median/mode example together with Group 2 before independent practice • Visual schedule and consistent routine maintained for predictability

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual schedule displayed showing today's routine for each group

• Group 2 has a snack break upon entering, consistent with established routine

• Clear transition between Group 1 and Group 2 blocks

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• GROUP 1 — AAC users:

• (warm-up) Dot-to-dot drawing of a car, counting 1 to 10 in sequence.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

• Visual schedule (board/projector)
• AAC devices (Group 1)
• Dot-to-dot car worksheet, numbers 1-10 (Group 1)
• Dot-to-dot city worksheet, numbers 1-39, with number-relationship questions (Group 2)
• Pictograph practice worksheet (Group 1)
• Graph/data set worksheet for finding mean, median, and mode (Group 2)

Vocabulary (New or Review):
• Count / sequence — review
• Pictograph — a graph that uses pictures/symbols to represent data
• Mean — the average of a set of numbers
• Median — the middle number in an ordered set of numbers
• Mode — the number that appears most often in a set

Sequence of the Lesson:
• (lesson) Group 1 completes Pictograph Practice: counting the number of an object in each row of a pictograph and writing down the total.
• GROUP 2 — no AAC devices:
• (entry) Students have a snack break upon entering.
• (warm-up) Dot-to-dot drawing of a city, numbers 1-39. Students also answer questions about the numbers (e.g., 'What is 5 more than 25?').
• (lesson) Group 2 uses a graph to find the mean, median, and mode of a data set, working through the first example together before practicing independently.

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?
• Briefly recap what was practiced today: counting and pictographs for Group 1; number relationships and mean/median/mode for Group 2.
• Collect completed worksheets.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?

5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
