Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation
PA Standard(s): • PA Core Academic Standards for Mathematics, CC.2.1.HS.F.6 — Extend the knowledge of numbers and their uses to connect mathematics to everyday situations. • PA Core Academic Standards for Mathematics, CC.2.2.HS.D.10 — Represent, solve, and interpret real-world problems using mathematical reasoning. • Career Education and Work connections: students practice functional time-management and independence skills that can be applied to school, work, appointments, and daily routines
Essential Question(s): Students will consider and reflect on throughout the lesson: • How can I use a clock to tell what time it is? • How can I figure out how much time has passed? • Why is knowing and managing time an important everyday skill?
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? By the end of the lesson, students will: • Read and identify times shown on an analog clock. • Match an example time by moving the hands on a Judy Clock. • For students working on elapsed time, determine how much time has passed between a beginning and ending time using a Judy Clock. • Participate using speech, AAC, sign language, pointing, writing, or another established communication method. • Demonstrate the targeted time skill with at least 80% accuracy, with

individualized prompting and accommodations as needed. • Practice independence, attention to task, and appropriate participation during the daily station.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: Students will show what they know by: • Teacher observation while students identify and match times on the Judy Clock. • Students moving Judy Clock hands to match an example clock. • Responses to questions about the hour, minute, beginning time, ending time, and elapsed time. • Individualized elapsed-time questions during the second group's warm-up. • Teacher observation of independence, prompting level, and accuracy during the station. • IXL progress-monitoring data collected by the TA. • Digitability login/navigation performance with the teacher. • Appropriate participation and turn-taking during the UNO station. • Brief response or demonstration during closure.	**Differentiated Instruction:** Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • First-group students will have access to AAC devices throughout instruction. • Provide longer processing/wait time before repeating questions or prompting responses. • Model responses using AAC, speech, gestures, and the Judy Clock. • Allow students to demonstrate understanding by moving clock hands, pointing, using AAC, gesturing, writing, or verbally responding. • Use concrete Judy Clocks and visual examples rather than relying only on verbal explanations. • Break directions into one step at a time and check understanding before adding another step. • Provide repeated practice and least-to-most prompting as needed. • Use the visual schedule and timer to support transitions and predictability.

	• Provide individualized IXL work and progress monitoring according to each student's level. • For students who demonstrate mastery, provide more complex elapsed-time questions or larger intervals. • Adjust the number and difficulty of questions based on individual readiness. • Provide adult assistance and accommodations required by student IEPs. • Reinforce participation, communication, independence, and effort with the classroom dollar-bill reward system.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Students enter, read the visual schedule, collect materials, and move to their work area.
• Teacher greets students individually and uses AAC with the first group to model functional communication.
• Students review classroom expectations before instruction.
• Dollar bills are provided as positive reinforcement for participation, communication, following directions, and completing routines.
• Students have a predictable snack and break between the first and second groups.
• The visual schedule and timer on the board communicate transitions and station time.
• During the station, students remain with their assigned adult/activity until the timer signals the transition.
• Adults use calm, concise directions and allow additional processing time when needed.
• Students may use established communication, sensory, and regulation supports consistent with their plans.
• Adults provide specific positive feedback and redirect students to the visual schedule or task when needed.
• Students can independently access clocks, laptops, communication devices, and station materials.

Domain III: Instruction

Activate Prior Knowledge/Motivation:
Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

• Show an analog clock and ask students what they notice.
• Review the hour hand and minute hand using the Judy Clock.
• Connect telling time to familiar routines such as arrival, snack, lunch, class changes, break, and going home.
• Explain that the first group will practice matching displayed times.
• Explain that the second group will build on telling-time skills by figuring out elapsed time.
• Emphasize that knowing time helps students become more independent at school, work, and in the community.

Materials Needed:

Math folders, laptops, whiteboard, markers, projection screen, math slideshow/visual examples, visual schedule, AAC devices, FM device as applicable, Judy Clocks, example analog clock, elapsed-time questions, classroom timer, dollar bills/fake dollar bills, IXL, Digitability, and UNO cards.

Vocabulary (New or Review):

Time, clock, analog clock, hour hand, minute hand, hour, minute, beginning time, ending time, elapsed time, before, after, earlier, later, o'clock, half hour, quarter hour.

Sequence of the Lesson:
What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

• 0–5 minutes — Entry Routine: Students enter, check the visual schedule, collect materials, and sit in their work area. Teacher greets students individually. With the first group, teacher uses AAC to model greetings and functional communication. Dollar bills are provided for participation and completion of the entry routine.

• 5–10 minutes — Mindfulness/Expectations: Complete the usual mindfulness

routine. Review classroom expectations and allow students to participate using speech, AAC, gestures, or another established method. Provide longer processing time for the first group.

• 10–25 minutes — Time Warm-Up, First Group: Display an example analog clock showing a specific time. Students look at the example and move the hands on their Judy Clocks to match it. Begin with familiar times and adjust difficulty individually. Ask students to identify the hour and minute when appropriate. Provide AAC support, visual cues, modeling, and extended processing time. Distribute dollar bills for participation and effort.

• 25–35 minutes — Individualized Time Practice: Continue practicing telling time with students who need additional support. Students demonstrating independence receive additional times to match. Teacher circulates, checks clock placement, provides feedback, and notes accuracy/prompting levels.

• 35–45 minutes — Snack and Break/Transition: Students clean up, transition according to the visual schedule, and participate in snack. Students then have a short break and may choose an appropriate activity. The timer signals when students should return.

• 45–50 minutes — Second Group Entry Routine: Second group enters, checks the visual schedule, gathers materials, and completes the snack/break routine as needed. Teacher reviews expectations and provides dollar bills for appropriate participation.

• 50–55 minutes — Mindfulness/Review: Complete the usual mindfulness routine and briefly review the hour hand, minute hand, and reading an analog clock. Introduce elapsed time as the amount of time that passes from a beginning time to an ending time.

• 55–65 minutes — Time Warm-Up, Second Group: Present elapsed-time questions using Judy Clocks. Give a beginning and ending time. Students move the Judy Clock forward and determine how many minutes or hours passed. Adjust complexity individually. Use concrete modeling, visual supports, verbal cues, and wait time. Reinforce participation with dollar bills.

• 65–85 minutes — Daily Station: Because this is a shorter class, students complete one station for the day. The timer on the board communicates the work period.

– IXL/Progress Monitoring: Students work with a TA on individualized IXL activities and progress monitoring. The TA records relevant data.

– Digitability: Students meet with the teacher to log into Digitability, practice navigating their account, and complete the assigned activity.

– UNO: Students work with a TA to play UNO while practicing turn-taking, following directions, communication, and social interaction.

Students are assigned to a station based on instructional needs. Adults monitor participation, provide prompts and feedback, and reinforce independence.

• 85–90 minutes — Closure: Review the day’s time skill. Students identify a time, match a displayed time, or demonstrate an elapsed-time answer based on their instructional level. Ask why knowing time is useful in everyday life. Review the station routine and preview the next lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Closure: Review the day’s time skill. Students identify a time, match a displayed time, or demonstrate an elapsed-time answer based on their instructional level. Ask why knowing time is useful in everyday life. Review the station routine and preview the next lesson.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
