Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math (Time Tuesday) **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation
PA Standard(s): • PA Career Education and Work Standard 13.3.11.B: Apply functional life skills, including telling time and tracking work hours/pay, needed for independent living. • Functional Math: Tell time to the hour and half hour; read and interpret a pictograph; add hours worked and calculate pay.
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do we tell time to the hour and to the half hour? • How can reading a pictograph help us understand information? • How do employees track hours worked and calculate pay?
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Group 1 (AAC users): Students will set a manipulative clock to match a time shown to the hour and communicate the time using their AAC device. • Group 1: Students will complete News2You Pictograph Practice, counting symbols on a pictograph to interpret data. • Group 2: Students will tell time to the half hour using the News2You warm-up. • Group 2: Students will complete IXL practice. • Group 2 (Payroll job): One student will review classmates' time cards from the past few weeks, add up shifts worked, and calculate pay owed.

• Both groups: Students will learn the math sign of the week ('cost') and participate in mindfulness and expectations review.

Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted.
• Group 1: accuracy of clock matched to the stated hour and AAC device response stating the time • Group 1: accuracy counting symbols during Pictograph Practice • Group 2: accuracy telling time to the half hour during the News2You warm-up • Group 2: IXL performance data • Payroll student: accuracy of shift totals and pay calculations • Participation in math sign of the week, mindfulness, and expectations review	• Group 1: manipulative clock paired with AAC device modeling; times kept to the hour for lower complexity • Group 1: pictograph symbols kept simple and consistent to support accurate counting • Group 2: half-hour time-telling and IXL matched to their higher independence level • Payroll job differentiated as a real-world vocational task for the student ready for that level of responsibility • Math sign of the week and mindfulness routine kept consistent across both groups for predictability

Domain II: Classroom Environment:
Describe Classroom/Behavior Management Plan & Routines

• Visual routine and materials list posted on the board

• Clear transition between Group 1 and Group 2 blocks

• Payroll job station set up separately to support the student's focus while reviewing time cards

• Consistent daily elements (math sign of the week, mindfulness, expectations) maintained across both groups

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• GROUP 1 — AAC users:

• (warm-up) Clock warm-up to the hour: teacher states and shows a time on their clock; students set

their own clock to match and then tell the teacher the time using their AAC device.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

- Visual routine and materials list (board/projector)
- AAC devices (Group 1)
- Teacher demonstration clock and individual student clocks (Group 1)
- News2You telling-time-to-the-half-hour warm-up (Group 2)
- Math sign of the week materials ("cost")
- Mindfulness meditation video
- News2You Pictograph Practice materials (Group 1)
- IXL access (Group 2)
- Classmates' time cards from the past few weeks (for the Payroll job)
- Payroll calculation sheet/tool

Vocabulary (New or Review):

- Hour / half hour — units of telling time
- Pictograph — a graph that uses pictures/symbols to represent data
- Cost — math sign of the week
- Shift — a period of time an employee works
- Payroll — the process of calculating how much employees are paid

Sequence of the Lesson:

- (math sign of the week) Introduce and demonstrate the sign for 'cost.'
- (mindfulness) Mindfulness meditation video.
- (expectations) Review class expectations.
- (activity) Group 1 completes News2You Pictograph Practice: students look at graphs with pictures and count the symbols to interpret the data.
- GROUP 2:
- (warm-up) News2You telling time to the half hour.
- (math sign of the week) Introduce and demonstrate the sign for 'cost.'
- (mindfulness) Mindfulness meditation video.
- (expectations) Review class expectations.
- (activity) Most students complete IXL practice. One student is assigned the 'Payroll' job: reviewing classmates' time cards from the past few weeks, adding up how many shifts each classmate worked, and calculating how much they should be paid.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- Briefly recap: what time did you practice telling today? What did you learn from the pictograph or from IXL?
- For the Payroll student: briefly review their totals and calculations.
- Preview that next Tuesday's Time Tuesday warm-up will continue building on these time-telling skills.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and

the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
