Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level:** 9-12

Student Name: Grace Dittman

<table>
<tr><th colspan="2">Domain I: Planning and Preparation</th></tr>
<tr><td colspan="2">PA Standard(s):
• CC.2.4.2.A.3: Tell and show time on a clock.
• CC.2.4.3.A.2: Solve problems involving intervals of time (elapsed time).
• IEP goals: Students use their AAC device or their voice to communicate, following each student’s IEP goals.</td></tr>
<tr><td colspan="2">Essential Question(s):
Students will consider and reflect on throughout the lesson:
• How do I show a time on a clock?
• How do I find how much time has passed (elapsed time)?
• How can I show what I know on my own?</td></tr>
<tr><td colspan="2">Objectives/Performance Expectations
What will students know and be able to do as a result of this lesson?
Students will be able to:
• Group 1: Show the time that is on the board using their clock.
• Group 2: Find elapsed time using their Judy clocks.
• Both groups: Complete their individual progress monitoring independently.</td></tr>
<tr><td>Assessment Evidence/Level of Learning
Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:
• Group 1: Student clock shows during the warm-up.
• Group 2: Student answers on elapsed time with their Judy clocks.
• Both groups: Individual progress monitoring, completed independently. The adult with each student takes data.
• Both groups: Observation of AAC use or verbal responses during the daily routine.</td><td>Differentiated Instruction:
Modifications in instruction and assessment for students with learning differences, specifically those with 504’s and IEP’s.
Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted.
• Group 1: I use a clock to model what each student’s clock should look like.
• Group 2: Judy clocks give students a hands-on way to find elapsed time.
• Both groups: Each student has a teacher, PCA, or teaching assistant with them during progress monitoring.
• Both groups: Students complete progress monitoring independently while the adult</td></tr>
</table>

	takes data. • **IEP/504:** Accommodations in each student's IEP/504 plan will be followed.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

- Same daily routine for both groups: meditation, expectations, then the Time Tuesday warm-up.
- Time Tuesday is a familiar weekly routine.
- Each student works with a teacher, PCA, or teaching assistant during progress monitoring.
- Students work independently, and the adult takes data.

Domain III: Instruction

Activate Prior Knowledge/Motivation:
Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Students use the same daily routine and the weekly Time Tuesday warm-up. The warm-up gets students thinking about time before they work independently on progress monitoring.

Materials Needed:

Meditation, classroom expectations, students' AAC devices, teacher AAC device, clock for modeling, student clocks, Judy clocks, times on the board, elapsed time questions, individual progress monitoring for each student, pencils

Vocabulary (New or Review):

Clock; time; hour; minute; hour hand; minute hand; elapsed time; start; end

Sequence of the Lesson:
What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Group 1

- Meditation.
- Expectations: I use my AAC device to find them and students use theirs.
- Time Tuesday warm-up: students show me the time that is on the board.
- I use a clock to model what each student's clock should look like.
- Progress monitoring: each student works independently with a teacher, PCA, or teaching assistant, who takes data.

Group 2

- Meditation.
- Expectations, said aloud.
- Time Tuesday warm-up: students find elapsed time using their Judy clocks.
- Progress monitoring: each student works independently with a teacher, PCA, or teaching assistant, who takes data.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Group 1: I use my AAC device to let students know they did a great job, and ask them to share one time they showed on their clock.
Group 2: I ask students to share how they found elapsed time.
Connection to Next Lesson: Students continue practicing telling time and elapsed time, and I use the progress monitoring data to plan next steps.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
