(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level:** 9-12

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • **CC.2.4.3.A.4:** Represent and interpret data using tally marks and bar graphs. • **CC.2.1.3.C.1:** Understand fractions as parts of a whole. • **IEP goals:** Students use their AAC device or their voice to communicate, following each student's IEP goals.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do tally marks show how many votes each restaurant got? • How does a bar graph show which restaurant got the most and the fewest votes? • How can I show how much of a whole is gone as a fraction?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? Students will be able to: • Group 1: Fill in the number of boxes on the graph that matches the tallies for each restaurant. • Group 2: Name a fraction to show how much of a pizza is gone, count the tallies, graph the restaurant votes, and answer questions about which restaurant has the most and the least. • Both groups: Use the graph to help plan the CBI trip.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • **Group 1:** Student graph: the boxes filled in to match the tallies. • **Group 2:** Student fractions for the pizza picture. • **Group 2:** Student tallies, graph, and answers to the follow-up questions. • **Group 1:** Progress monitoring and Bankability prep for the students who work on those while others are at speech.	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • **Group 1:** Students continue the graph they started, so they can pick up where they left off. • **Group 1:** One student works on progress monitoring and one on Bankability prep until the others return from

	speech. • **Group 1:** I model my AAC device while giving directions. • **Group 2:** A picture of a pizza gives students a visual for the fraction warm-up. • **Group 2:** Group 2 takes a break and snack first. • **Both groups:** Adult support is given as each student needs it. • **IEP/504:** Accommodations in each student's IEP/504 plan will be followed.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

- Class is shorter today, so Group 1 skips the warm-up.
- Same routine for both groups: meditation, then expectations.
- Group 1 students work on different tasks until all students are back from speech.
- Group 2 takes a break and snack, then does a quick fractions warm-up.
- The restaurant vote graph helps students plan their CBI trip.

Domain III: Instruction

Activate Prior Knowledge/Motivation:

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Students voted on where they want to eat for the CBI trip and made tallies. Today they use their own tallies to finish the graph, which connects the math to a trip they are looking forward to.

Materials Needed:

Meditation, classroom expectations, students' AAC devices, teacher AAC device, restaurant vote tallies, bar graph, pizza picture, snack items, individual progress monitoring, Bankability prep materials, pencils and crayons

Vocabulary (New or Review):

Tally; vote; graph; most; least; fraction; whole; part; restaurant

Sequence of the Lesson:

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their

performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Group 1

- Meditation.
- Expectations: I use my AAC device to find them and students use theirs.
- No warm-up today because class is shorter.
- One student does progress monitoring and one student does their Bankability prep while the other students are at speech.
- When the other two students return from speech, we continue graphing our tallies for the restaurant vote for the CBI.
- Students look at the tallies and fill in the number of boxes on the graph for each restaurant.

Group 2

- Meditation.
- Expectations, said aloud.
- Break and snack.
- Quick fractions warm-up: students look at a picture of a pizza and tell me how much of the pizza is gone, as a fraction.
- Students count the tallies and graph the restaurant votes.
- Students answer follow-up questions, such as which restaurant has the most and which has the least.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Group 1: I use my AAC device to ask students which restaurant has the most boxes on their graph.
Group 2: I ask students to share which restaurant has the most and which has the least, and how they know from the graph.
Connection to Next Lesson: Students use the results to plan the CBI trip.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.

7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
