(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Learning Support Math **Grade Level:** 9th

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • **CC.2.1.7.D.1:** Analyze proportional relationships and use them to solve real-world and mathematical problems. • **Absolute value:** Understand absolute value as the distance of a number from zero on a number line.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do I solve a proportion? • How do I solve an absolute value equation? • How can I check that my answer makes sense?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? Students will be able to: • Finish the proportions practice worksheet. • Solve proportion equations and absolute value equations with support during the review. • Review absolute value and proportions by playing Gimkit. • Show what they know about proportions and absolute value on the quiz.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • **Formative:** Proportions practice worksheet. • **Formative:** Quiz review: questions we do together and questions students do independently. • **Formative:** Gimkit results on absolute value and proportions. • **Summative:** Quiz on proportions and absolute value.	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • **Time:** Students who haven't finished the proportions worksheet get time to finish it. • **Process:** We do a few review questions together and students do a few independently. • **Process:** Gimkit gives students a fun way to practice and get quick feedback.

	• **Process:** A short Gimkit review on proportions after lunch helps students get ready for the quiz. • **IEP/504:** Accommodations in each student's IEP/504 plan will be followed.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

- Students begin by finishing their proportions practice worksheet if they haven't already.
- Students work on the review together and then independently.
- The class plays Gimkit before lunch and after lunch.
- After lunch, students have the rest of class to take the quiz.

Domain III: Instruction

Activate Prior Knowledge/Motivation:

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Students have practiced proportions and absolute value in earlier lessons. The review and the Gimkit games bring those skills back before the quiz, and Gimkit makes the practice fun.

Materials Needed:

Proportions practice worksheet, quiz review (4 proportion questions and 4 absolute value questions), Gimkit (absolute value and proportions), student devices, quiz, paper and pencils

Vocabulary (New or Review):

Ratio; proportion; cross multiply; absolute value; distance; zero; solve; check

Sequence of the Lesson:

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Finish the Proportions Practice Worksheet

- Students finish the worksheet if they haven't already.

Quiz Review

- The review has 4 proportion questions and 4 absolute value questions.
- We do a few together and students do a few independently.

Absolute Value Gimkit — about 10 minutes

- Students play an absolute value Gimkit.

Lunch

After Lunch

- We play a short Gimkit review on proportions.
- Students take the quiz and have the rest of class to finish it.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

As students finish the quiz, they hand it in. I use the quiz and Gimkit results to see which skills students know and which need more practice. This finishes our Unit 1 material.
Connection to Next Lesson: Teacher uses the quiz results to plan the next lesson and the start of the next unit.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
