Lesson Plan Framework

Subject Area: Learning Support Math **Grade Level:** 9th

Student Name: Grace Dittman

<table>
<tr><th colspan="2">Domain I: Planning and Preparation</th></tr>
<tr><td colspan="2">PA Standard(s):
• CC.2.2.8.B.2: Understand the connections between proportional relationships, lines, and linear equations, including slope as a rate of change.</td></tr>
<tr><td colspan="2">Essential Question(s):
Students will consider and reflect on throughout the lesson:
• What is slope, and what does it tell me about a line?
• How can I tell if a slope is positive, negative, zero, or undefined?
• How can I use the slope formula to find the slope between two points?</td></tr>
<tr><td colspan="2">Objectives/Performance Expectations
What will students know and be able to do as a result of this lesson?
Students will be able to:
• Explain rate of change and identify the four types of slope: positive, negative, zero, and undefined.
• Use Slope Man to remember the types of slope.
• Copy and use the slope formula notes, with examples done together.
• Begin independent slope practice, if time allows.</td></tr>
<tr><td>Assessment Evidence/Level of Learning
Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:
• Formative: Student answers as we do the examples together on the board.
• Formative: Student responses naming the types of slope.
• Formative: Independent slope practice, if we get to it.</td><td>Differentiated Instruction:
Modifications in instruction and assessment for students with learning differences, specifically those with 504’s and IEP’s.
Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted.
• Content: Slope Man gives students a visual way to remember positive, negative, zero, and undefined slope.
• Content: Notes are on the board for students to copy, so everyone has the same notes.
• Process: We do examples together after each set of notes.
• Process: Independent practice is only given if there</td></tr>
</table>

	is time. • **IEP/504:** Accommodations in each student's IEP/504 plan will be followed.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

- Students begin Unit 2 with notes on the board, which they copy.
- We do the examples together after each set of notes.
- Students go to lunch after the first examples, and we continue with the slope formula afterward.
- Independent practice is given only if time allows.

Domain III: Instruction

Activate Prior Knowledge/Motivation:

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Students have seen proportions and rates, so rate of change builds on what they already know. Slope Man gives them a fun picture for remembering the four types of slope before they use the slope formula.

Materials Needed:

Board, rate of change and types of slope notes, Slope Man, slope formula notes, examples, paper and pencils, independent slope practice (if time allows)

Vocabulary (New or Review):

Slope; rate of change; positive; negative; zero; undefined; rise; run; slope formula; point

Sequence of the Lesson:

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Rate of Change and Types of Slope Notes

- We start Unit 2, slope, with notes on rate of change and the types of slope.
- I show students Slope Man to help them remember positive slope, negative slope, zero slope, and undefined slope.
- We do the examples together.

Lunch

After Lunch

- Students take notes on the slope formula.

- We do examples together.
- If we get to it, students begin independent slope practice.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

At the end of class, I ask students to name the four types of slope and tell me one step of the slope formula. I use their answers to see who needs more practice. Connection to Next Lesson: Students continue practicing slope.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?

5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
