Gwynedd Mercy University–School of Business & Education

(Must be used for each lesson observed by University Supervisor)

Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level:** 9–12

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): ● PA Academic Standards for Personal Finance, 17.3.9-12.A — Develop a process for making informed spending decisions. ● PA Academic Standards for Personal Finance, 17.3.9-12.C — Develop a personal approach to keeping track of income and spending. ● PA Academic Standards for Personal Finance, 17.3.9-12.D — Evaluate budgeting approaches and methods for organizing money. ● Career Education and Work, 13.3.11.F — Demonstrate appropriate work habits and behaviors (financial accountability, following routines). ● Standards for Mathematical Practice: MP1 — Make sense of problems and persevere; MP6 — Attend to precision.	
Essential Question(s): *Students will consider and reflect on throughout the lesson:* ● How can I keep track of the money I earn? ● How do I make a deposit and what does it mean to save money in a bank account? ● How can I tell whether I have enough money to buy something I want? ● Why is it important to be responsible with money?	
Objectives/Performance Expectations *What will students know and be able to do as a result of this lesson?* By the end of the lesson, students will: ● Count earned cash (one-dollar bills and/or coins) with increasing independence or with appropriate adult support. ● Complete or participate in completing a deposit slip by recording the correct dollar amount. ● Navigate the Bankability program to locate their account balance, deposit earnings, and view any bills due. ● Demonstrate understanding that money can be deposited, saved, or used to purchase items from the school store. ● Communicate during the banking routine using their established method (AAC device, speech, pointing, gestures, or writing). ● Demonstrate targeted skills with at least 80% accuracy with IEP accommodations and prompting as needed.	
Assessment Evidence/Level of Learning *Students will show what they know by:* ● Teacher observation of counting accuracy during the individual banking rotation.	**Differentiated Instruction** *Modifications for IEPs/504s; Extensions for advanced learners:* GROUP 1 (lower level / primarily nonverbal):

● Review of completed or partially completed deposit slips (with assistance as needed). ● AAC device use, pointing, gestures, or verbal responses during banking and shopping decisions. ● Teacher data on prompting level needed for each student during the banking routine. ● Observation of student navigation of Bankability (locating balance, completing deposit). ● Group 2: calculator use and self-checking when determining whether they can afford items. ● Closure check: each student identifies or demonstrates one banking skill from the lesson.	• Model all communication using classroom AAC device; accept any modality (AAC, gesture, pointing, eye gaze, sign). • Provide physical prompting, hand-over-hand support, or adult scribing for deposit slips. • Use least-to-most prompting; fade when student shows independence. • Pair verbal directions with visual supports, gestures, and modeling. • TA, PCAs, and cooperating teacher provide 1:1 support during banking rotation. • Reduce money denominations or total amount based on individual skill level. GROUP 2 (more independent / verbal): • Students count money and complete deposit slips independently before coming to the bank. • Students use calculators to add item costs and determine affordability. • Extend: ask students to calculate change or compare prices of multiple items. • Students verbally explain their banking decisions (deposit, save, or spend). BOTH GROUPS: • Visual schedules and timers communicate transitions. • Positive reinforcement for following routines and participating. • Extended time as needed per IEP. • FM device and preferential seating as appropriate per IEP.
Domain II: Classroom Environment — Behavior Management Plan & Routines	
● Students enter, locate their math folder and deposit slip at their workstation, and follow the posted visual schedule. ● Student teacher greets Group 1 individually using the AAC device to model "hello"; Group 2 receives a verbal greeting. ● Classroom expectations are reviewed at the start of each block; banking routine is previewed. ● A visual schedule and countdown timer are posted and referenced throughout both blocks. ● Cooperating teacher, TA, and PCAs circulate during the banking rotation to minimize wait time for Group 1.	

- Positive verbal and tangible reinforcement (reward cash) is provided for following routines and communicating.
- Group 1: Classroom is arranged for wheelchair/mobility access; AAC devices are charged and available at each workstation.
- Group 2: Students have a 10-minute snack/leisure break upon arrival before independent work begins.
- Cool Math Games serves as a structured independent activity after banking is complete.
- All adults use calm, consistent language and prompting strategies aligned with each student's IEP.

Domain III: Instruction

Activate Prior Knowledge/Motivation:

How will you activate prior knowledge, build background, or review previous lessons?

- Students have participated in Bankability throughout the school year and are familiar with earning and depositing money.
- They have practiced counting dollar bills in previous Life Skills Math lessons.
- Prior lessons have introduced vocabulary: "deposit," "bank account," "balance," and "bills."
- Activation for Group 1: Using the AAC device and visuals, ask "What do we do on Bankability day?" during the greeting routine.
- Activation for Group 2: Brief verbal exchange during entry — "What do we do on Bankability day?" and "What does it mean to deposit money?"

Materials Needed:

- Math folders (one per student)
- Deposit slips (one per student)
- Earned cash (one-dollar bills and/or coins collected throughout the week)
- Bankability computer program (student laptops + teacher computer)
- AAC devices (Group 1)
- Calculators (Group 2)
- Visual schedule and countdown timer
- School store items / prize menu
- Cool Math Games (on student laptops)
- FM device (as applicable per IEP)
- Reinforcement reward cash

Vocabulary (New or Review):

Deposit, Withdrawal, Balance, Bank Account, Paycheck, Bills, Budget, Save, Spend, Cost, Afford, Receipt

Sequence of the Lesson:

Learning activities/strategies, student application, monitoring of performance:

—— GROUP 1 (approx. 0–45 min) ——

0–5 min | Entry & Setup

Students enter and are assisted by TA/PCAs in locating their math folder and a deposit slip. Student teacher uses the AAC device to individually model "hello" to each student, accepting any communicative response. Visual schedule is reviewed.

5–10 min | Count Money & Fill Out Deposit Slip

Each student (with adult support as needed) counts earned cash using least-to-most prompting. Students write or have an adult scribe the total on their deposit slip. AAC device models functional vocabulary: "count," "money," "deposit," "how much."

10–40 min | Individual Banking Rotation

Student teacher calls students to the bank (teacher desk/computer) one at a time. At the bank:

- Student teacher and student count the money together to verify the total.
- Student teacher enters the deposit into Bankability and adds the weekly $100 paycheck.
- Student teacher tells the student their new balance and whether any bills are due.
- If the student has enough money after bills, they may shop at the school store, communicating their choice via AAC, pointing, or gesture.

While waiting, students are supported by TA/PCAs with deposit slips, quiet tasks, or regulation supports. Cool Math Games is available as a structured wait activity.

40–45 min | Closure & Transition (Group 1)

Student teacher briefly reviews: "Today we made a deposit and checked our balance." Each student is prompted to indicate one banking action (via AAC, gesture, or verbal). Students earn reward cash for participation. Group 1 transitions out.

── TRANSITION (approx. 45–55 min) ──

Group 2 enters and locates their math folder and a deposit slip. Students begin a 10-minute snack and leisure break. Timer is posted. Student teacher and TA reset the banking station.

── GROUP 2 (approx. 55–90 min) ──

55–65 min | Independent Money Counting & Deposit Slip Completion

After the break timer ends, students sit at workstations. Student teacher briefly reviews: "What are we doing today?" Students independently count earned cash and complete their deposit slip (name, date, amount). Student teacher circulates to check accuracy.

65–85 min | Individual Banking Rotation

Student teacher calls students to the bank one at a time. At the bank:

- Student states: "I would like to make a deposit."
- Student teacher and student count the money together to verify the deposit slip amount.
- Student teacher enters the deposit and weekly $100 paycheck into Bankability.
- Student teacher informs the student of their new balance and any bills due.
- If the student wishes to shop, they use a calculator to add item costs and confirm affordability before purchasing.

Students not yet at the bank work independently: finishing deposit slips, calculating potential purchases from the school store price list, or playing Cool Math Games.

85–90 min | Closure (Group 2)

Student teacher brings group together. Students share one thing they did in Bankability today (e.g., "I made a deposit," "I paid a bill," "I saved my money"). Student teacher previews next Bankability day and reminds students to keep earning cash throughout the week.

Closure:

How will you bring closure to the lesson and preview what follows?

- Group 1: Student teacher asks each student (via AAC, gesture, or verbal prompt) to indicate one banking action they completed. Reward cash given for participation.
- Group 2: Students verbally share one thing they did in Bankability. Financial vocabulary is reinforced.
- Both groups: Student teacher previews the next lesson, students will continue earning cash and have another opportunity to deposit and shop on the next Bankability day.
- Students are reminded to keep track of their earnings during the week.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you ensure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you ensure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques ensured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
