TI - 84+ GRAPHING *calculator tips*

On/Off

- To turn the calculator **on**, press the ON key in the lower left-hand corner of your calculator.
- To turn the calculator **off**, press 2ND ON.

Changing the Window

- To change the window, press WINDOW. You will need to change your Xmin, Xmax, Xscl, Ymin, Ymax, and Yscl.
- Do not change the XRes

Clear Memory

- To clear the calculator's memory, press 2ND + 7 ← 1 2

Variable X

- When using Y= you will need to use the X,T,θ,*n* to input a variable.

2nd Key

- To access a function on the calculator in YELLOW on the TI-83+ and BLUE on the TI-84+ above the calculator keys, you must press 2ND to access the function.

Squares and Square Roots

- To square any number, type in the number then press x^2.
- To square root any number, press 2ND x^2.

Exponents

- To raise a number to a power other than 2, you must press the raise to a power key ^. (Located below the clear button.)

Exit Screen

- To exit any screen (table, graph, etc.), press the 2ND MODE keys.

Negatives vs. Operations (+, -, x, and ÷)

- The negative symbol (-) is to the left of the ENTER button. It will show up on the calculator in the same color as the numbers.
- The operations will always be above the ENTER button.
- The calculator will give you an error if you use the subtraction symbol as the negative sign.

Y=, Tables, and Graphs…OH MY!

- To insert a function into the calculator, press Y=.
- To get to the table on the calculator, press 2ND GRAPH.
- To graph a function, first put the equation into Y= then press GRAPH.

TI - 84+ GRAPHING *calculator tips*

Line of Best Fit using STAT

1. Press STAT ENTER
2. Enter your x-values in L1 and y-values in L2
3. Press STAT
4. Arrow → to Calculate
5. Pick one based on the pattern
   - 4:LinReg
   - 5:QuadReg
   - 0:ExpReg
6. Press Calculate

Correlation Coefficient

To find the Correlation Coefficient (r) Value, you need to turn on the diagnostics!

1. Press Mode Scroll down to STAT Diagnostics ON
2. Then use STAT like you would for the line of best fit.
3. The value of r is your correlation coefficient

Putting in Fractions

Fraction bars mean division. When you see $\frac{4}{8}$ this means to put $4 \div 8$ into your calculator.

or

Press ALPHA Y= ENTER and put in the fraction. Use the arrows to get to the denominator.

Putting in Mixed Numbers

To put in the mixed number $12\frac{4}{8}$ this means to put $(12 + 4 \div 8)$ into your calculator.

or

Press ALPHA Y= 2 and put in the whole number then use the arrows to put in the fraction.

Decimal to a Fraction

After you have your answer in decimal form press the following buttons MATH ENTER ENTER

Fraction to a Decimal

After putting in a fraction using the Alpha Y= ENTER press the following buttons MATH 2 ENTER

or

If you put in your fraction $\frac{4}{8}$ like $4 \div 8$ then just press ENTER

Absolute Value

1. Press MATH → ENTER
2. You will see |■|
3. Put the value/problem inside the absolute value using the arrows

Using Pi

You can use the Pi button by pressing 2ND ^

or

You can use 3.14 or 3 depending on your teachers' recommendation
