Name _____

Algebraic Expressions

Identify the Coefficient in the expression.

1) The coefficient of x in the expression $5x + 3$ is _____ .

2) The coefficient of y^2 in the expression $7y^2 - 4y + 9$ is _____ .

3) The coefficient of a in the expression $6a + 2$ is _____ .

4) The coefficient of x^2 in the expression $7x^2 + 3x - 8$ is _____ .

5) The coefficient of b^2 in the expression $2b^2 + 3b - 7$ is _____ .

6) The coefficient of x in the expression $3x - 2y + 5$ is _____ .

7) The coefficient of t in the expression $6t^2 - 4t + 1$ is _____ .

8) The coefficient of u in the expression $8u - 9$ is _____ .

9) The coefficient of u^2 in the expression $-10u^2 + 7u - 2$ is _____ .

10) The coefficient of w in the expression $11w + 14$ is _____ .
