Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level:** 9-12

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • **CC.2.4.3.A.4:** Represent and interpret data using scaled pictographs and bar graphs. • **CC.2.4.HS.B.1:** Summarize and interpret data, including finding the mean, median, and mode. • **IEP goals:** Students use their AAC device or their voice to communicate, following each student's IEP goals.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • What can a graph tell me? • How can I compare groups on a bar graph or pictograph to find which has more? • How do the mean, median, and mode describe a set of numbers?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? Students will be able to: • Group 1: Read a bar graph to tell which color is higher, and read a News2you pictograph to find which picture appears most or count the pictures, based on their IEP goal. • Group 2: Read a bar graph to tell which category got the most votes, compare categories, and name the most popular device. Then find the mean, median, and mode of data shown on graphs. • Both groups: Follow the daily routine of mindfulness, expectations, and the ASL sign of the week.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • **Group 1:** Student responses to "What color is higher?" (by AAC device, pointing, or voice) and to the pictograph task, matched to each IEP goal. • **Group 2:** Student responses about votes, comparing categories, and the	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • **Group 1:** I ask a simpler question (which color is higher) and students pick which picture appears most or count,

most popular device, followed by the mean, median, and mode answers they find. • **Both groups:** Observation of AAC use or verbal responses during the daily routine.	whichever is closest to their IEP goal. • **Group 1:** I model my AAC device while asking questions. • **Group 2:** I ask more in-depth questions: compare categories and name the most popular device, then find mean, median, and mode. • **Both groups:** The same graph is used for both groups, so everyone works on the same idea at a different level. • **Reinforcement:** Fake money is earned for participating and helping a friend. • **IEP/504:** Accommodations in each student's IEP/504 plan will be followed.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

- Same daily routine every day: materials, mindfulness, expectations, and ASL sign of the week, so students know what to expect.
- What's the Number Wednesday is a familiar weekly routine.
- Group 1 hears and sees questions at a level that fits their IEP goal. I model the AAC device while I ask.
- Group 2 takes a snack/leisure break first, with a timer on the board.
- Students earn fake money for participating and helping a friend.

Domain III: Instruction

Activate Prior Knowledge/Motivation:

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

The daily routines (mindfulness, expectations, and the ASL sign of the week) and the weekly What's the Number Wednesday graph are familiar to students. The topic, "What is your favorite technology?", connects to students' own interests and helps them stay engaged.

Materials Needed:

Visual schedule, projector/board, mindfulness video, students' AAC devices, teacher AAC device, classroom expectations, ASL sign of the week, What's the Number Wednesday bar graph ("What's your favorite technology?"), News2you pictograph, graphs for mean/median/mode, pencils, fake money, timer

Vocabulary (New or Review):

Graph; bar graph; pictograph; most; compare; votes; popular; mean; median; mode

Sequence of the Lesson:
What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Group 1 — 9:15–9:52

- Students gather their materials.
- Daily mindfulness.
- Review the expectations: I use my AAC device to find them and students use theirs.
- ASL sign of the week.
- What's the Number Wednesday: bar graph with two colors, "What's your favorite technology?" I ask, "What color is higher?"
- News2you pictograph lesson: students choose which picture appears most, or count the pictures, whichever is closest to their IEP goal.
- I model my AAC device throughout and hand out fake money for participating and helping a friend.

Group 2 — begins at 9:52

- Students grab their materials.
- Snack and leisure break until 10:08 (timer on the board).
- Daily meditation.
- Review the expectations aloud.
- ASL sign of the week.
- What's the Number Wednesday: the same bar graph, with more in-depth questions. Students tell me what got more votes, compare categories, and answer what the most popular device is.
- Students look at graphs and find the mean, median, and mode.
- I hand out fake money for participating and helping a friend.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Group 1: I use my AAC device to ask students to share one thing they learned from the graphs, such as which color or picture was most.
Group 2: I ask students to tell me the mean, median, and mode they found and what the graph tells us about favorite technology.
Connection to Next Lesson: Students continue reading graphs and using data in everyday situations.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?

4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
