Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level:** 9-12

Student Name: Grace Dittman

<table>
<tr><th colspan="2">Domain I: Planning and Preparation</th></tr>
<tr><td colspan="2">PA Standard(s):
• CC.2.2.2.A.1: Represent and solve addition problems.
• CC.2.2.3.A.1: Represent and solve problems involving multiplication.
• Money skills: Functional skills: use money and a bank account to plan a purchase and check that there is enough money.
• IEP goals: Students use their AAC device or their voice to communicate, following each student's IEP goals.</td></tr>
<tr><td colspan="2">Essential Question(s):
Students will consider and reflect on throughout the lesson:
• How can a calculator help me solve a word problem?
• How do I know if I have enough money to buy what I want?
• How can I make a good choice about spending my money?</td></tr>
<tr><td colspan="2">Objectives/Performance Expectations
What will students know and be able to do as a result of this lesson?
Students will be able to:
• Group 1: Count the pictures in a word problem and use a calculator to add the objects together.
• Group 2: Solve multiplication word problems using a calculator.
• Both groups: Watch a video about receiving a paycheck, check and write down the amount in their bank account, decide whether to shop at Bankability, and choose items they can afford using the prices next to the pictures.</td></tr>
<tr><td>Assessment Evidence/Level of Learning
Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:
• Group 1: Student answers to the picture word problem and use of the calculator to add.
• Group 2: Student answers to the multiplication word problems.
• Both groups: The amount each student writes down from their bank account.
• Both groups: Items each student chooses, checked against the amount</td><td>Differentiated Instruction:
Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's.
Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted.
• Group 1: The word problem uses pictures to count and a calculator to add.
• Group 1: I model my AAC device while asking questions.
• Group 2: Multiplication word</td></tr>
</table>

in their account, show whether they know they have enough. • **Both groups:** Observation of AAC use or verbal responses during the daily routine.	problems with a calculator. • **Both groups:** Choices are based on pictures with prices next to them, so students can pick items they want. • **Both groups:** Students decide for themselves whether to shop the next day. • **Both groups:** Adult support is given as each student needs it. • **IEP/504:** Accommodations in each student's IEP/504 plan will be followed.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

- Same daily routine every day: materials, mindfulness, expectations, and ASL sign of the week.
- Think About It Thursday is a familiar weekly routine.
- Each student has a folder with pictures and prices.
- Group 2 takes a snack/leisure break first, with a timer on the board.
- Adults give help as needed while students check their accounts and make choices.

Domain III: Instruction

Activate Prior Knowledge/Motivation:
Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

The daily routines and the weekly Think About It Thursday are familiar to students. The warm-up reviews counting, adding, and multiplying with a calculator, which students use to make money decisions. Shopping at Bankability the next day motivates students and connects math to real life.

Materials Needed:

Visual schedule, projector/board, mindfulness video, students' AAC devices, teacher AAC device, classroom expectations, ASL sign of the week, Think About It Thursday word problems, calculators, Digitability paycheck video, students' bank account information, student folders with pictures and prices, pencils, timer

Vocabulary (New or Review):

Count; add; total; multiply; paycheck; bank account; amount; price; enough; shop

Sequence of the Lesson:

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Group 1 — 9:15–9:52

- Students gather their materials.
- Daily mindfulness.
- Review the expectations: I use my AAC device to find them and students use theirs.
- ASL sign of the week.
- Think About It Thursday: students count the pictures in a word problem and use a calculator to add the objects together.
- Bankability prep: students watch the Digitability video about receiving a paycheck.
- Students check their bank account and write down the amount.
- Students decide whether they want to shop at Bankability the next day.
- Students choose what they want using the pictures and prices in their folders, making sure they have enough.
- I model my AAC device throughout.

Group 2 — begins at 9:52

- Students grab their materials.
- Snack and leisure break until 10:08 (timer on the board).
- Daily meditation.
- Review the expectations aloud.
- ASL sign of the week.
- Think About It Thursday: students solve multiplication word problems using a calculator.
- Bankability prep: students watch the Digitability video about receiving a paycheck.
- Students check their bank account and write down the amount.
- Students decide whether they want to shop at Bankability the next day.
- Students choose what they want using the pictures and prices in their folders, making sure they have enough.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Group 1: I use my AAC device to ask students to share one thing they chose and whether they have enough money for it.
Group 2: I ask students to tell me the amount in their account, what they chose, and how they know they have enough.
Connection to Next Lesson: Students who decide to shop go to Bankability the next day and use their choices from today.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?

4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
