Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math (CBI) **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • PA Career Education and Work Standard 13.3.11.B: Analyze consumer skills, including comparison shopping and unit pricing, needed for independent living.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • How can we compare prices to find the best value when shopping? • What steps are involved in successfully completing a shopping trip from start to finish?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will locate and select their assigned grocery items using a picture list. • Students will (as appropriate to individual goals) compare size and price to select the best-value item. • Students will use appropriate social skills at checkout, including greeting the cashier and bagging items. • Students will safely walk to and from the store as part of the group. • Students will correctly put away purchased items in their designated spot in the school kitchen.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • Checklist: student successfully located and selected all 3 assigned items	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted.

• For students working on price comparison: correct selection of the best-value item based on size/price • Adult observation of safety and behavior during the walk, in-store, and at checkout • Correct placement of items in designated kitchen storage upon return	• Each student paired 1:1 with an adult for support throughout the trip • Picture-based grocery list provided for students who are non-readers or benefit from visual supports • Price/size comparison introduced as an extension goal for students working on that skill; other students focus on locating and selecting their items • Communication supports (AAC device, visual cue cards) available as needed for checkout interactions • Trip broken into clear, sequential steps with a visual schedule to support predictability

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Safety expectations and walking route reviewed with all students before leaving the building

• Students divided into small groups, each with an assigned adult for the entire trip

• Visual schedule of the CBI trip sequence reviewed before departure (walk to Giant → shop → checkout → walk back → put away)

• Clear meeting point established (registers) for regrouping after shopping

• Store behavior expectations reviewed (indoor voice, staying with adult, respectful interactions with staff/other shoppers)

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• (0-5 min) Review the visual schedule for today's CBI trip to Giant. Assign students to groups/adults and hand out each student's picture grocery list (3 items per student). Review safety expectations for the walk and appropriate behavior in the store.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

- Picture grocery list for each student (3 items per list)
- Visual schedule of the CBI trip
- Payment method (school funds/card or cash)
- Reusable bags
- AAC devices/communication supports as needed
- Kitchen storage labels/guide for correct put-away location

Vocabulary (New or Review):

- Compare — looking at two or more items to decide which is better
- Unit price — the cost per size/amount of an item, used to compare value
- Best value/best buy — the item that gives the most for the lowest price
- Greet — to say hello or acknowledge someone politely

Sequence of the Lesson:

- (5-20 min) Walk to Giant as a group, with students remaining with their assigned adult.
- (20-45 min) Shopping: in small groups, each student locates their 3 assigned items using their picture list. Adults support as needed. For students working on comparison shopping, adults prompt them to look at price and size to choose the cheaper option of the correct size.
- (45-50 min) Students and adults meet at the registers with their items.
- (50-55 min) Checkout: students place their items on the belt, greet the cashier, and bag their items with adult support as needed.
- (55-70 min) Walk back to school as a group, with students remaining with their assigned adult.
- (70-85 min) Students put their purchased items away in the correct designated spot in the school kitchen.

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- (85-90 min) Gather as a class to briefly discuss the trip: what items did you find, did anyone compare prices, what went well or felt challenging? Preview how these items may be used in an upcoming cooking/kitchen lesson.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity,

to improve any of the Domains of Professional Practice.
