Lesson Plan Framework

Subject Area: Life Skills Math (Money Monday) **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • PA Career Education and Work Standard 13.3.11.B: Analyze consumer skills, including budgeting and determining affordability of items, needed for independent living. • Functional Math: Add multiple prices to determine a total cost and compare it to a given budget.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do we determine if we have enough money to buy an item or items? • How can I use my communication device to express my understanding of money?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Group 1 (AAC users): Students will use their AAC device to indicate whether they can afford an item (yes/no) or state its price, given a $3 budget, across 4 grocery catalog slides. • Group 1: Students will participate in a mindfulness meditation video and follow class expectations modeled using their AAC device. • Group 2: Students will add the prices of 3 grocery items and determine whether all 3 can be purchased within a $15 budget. • Both groups: Students will complete daily progress monitoring.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction

• Group 1: AAC device responses (yes/no or stated price) across the 4 Money Monday catalog slides • Group 1: progress monitoring data • Group 2: completed price addition/budget check for the 3 grocery items • Group 2: progress monitoring data • Observation of following the daily routine and expectations	and assessment for students who are above grade level and/or gifted. • Group 1: AAC device vocabulary (yes/no, item prices) modeled by the teacher before independent use • Group 1: mindfulness video and class expectations modeled using the AAC device to reinforce communication • Group 1: catalog slides use pictures alongside prices, with low, simple prices for single-item comparison • Group 2: task is more complex (adding 3 prices against a budget), matched to their higher independence level • Group 2: visible timer displayed during snack/break to support predictability • Visual schedule and materials list posted for both groups

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual routine and materials list (math folder, laptop, pencil) posted on the board

• Group 1 greeted individually at the start of their block, modeled with the AAC device

• Timer displayed on the board during Group 2's snack/break

• Clear transition between groups

• Calm, patient environment maintained during AAC modeling and mindfulness video

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• GROUP 1 — AAC users (0-45 min):
• (0-5 min) Students enter, follow the routine on the board, and gather their materials (math folder, laptop, pencil). Greet the first group of students, modeled with the AAC device.
• (5-10 min) Mindfulness meditation video.
• (10-15 min) Review class expectations, modeled using the AAC device.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

- Visual routine and materials list (board/projector)
- AAC devices (Group 1)
- Mindfulness meditation video
- Money Monday grocery catalog — Group 1 version: 4 slides, $3 budget, one item per slide with picture and price
- Money Monday grocery catalog — Group 2 version: list of 3 items with prices, $15 budget
- Timer (Group 2 snack/break)
- Math folders, laptops, pencils
- Progress monitoring tool/program

Vocabulary (New or Review):

- Afford — having enough money to buy something
- Budget — the amount of money you have to spend
- Price — how much an item costs
- Total — the sum after adding amounts together

Sequence of the Lesson:

- (15-25 min) Money Monday warm-up: view the 4 grocery catalog slides. For each slide ("You have $3, can you afford ___?"), students use their AAC device to say yes/no or state the item's price.
- (25-45 min) Progress monitoring for Group 1.
- GROUP 2 — no AAC devices (45-90 min):
- (45-60 min) Snack and break (15 min), with a timer displayed on the board.
- (60-65 min) Students enter, follow the routine on the board, and gather their materials.
- (65-80 min) Money Monday warm-up: students view a catalog showing 3 items with prices and determine whether they can buy all 3 with a $15 budget by adding the prices together.
- (80-90 min) Progress monitoring for Group 2.

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- Briefly recap: did you have enough money for your items today? What helped you figure that out?
- Preview that next Monday's Money Monday warm-up will continue building on these budgeting skills.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
