Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level: 9-12**

Student Name: Grace Dittman

The 90-minute class is divided into two 45-minute instructional groups. Both groups receive the same overall lesson and routines, with activities and questioning differentiated according to individual student needs and current skill levels.

Domain I: Planning and Preparation
PA Standard(s): **Career Education and Work – 13.3.11.F:** Demonstrate appropriate work habits and behaviors. **Mathematics – PA Academic Standards:** Students will apply mathematical concepts and skills to solve problems and interpret mathematical information in meaningful contexts.
Essential Question(s): Students will consider and reflect on throughout the lesson: Students will consider: • How can I use counting skills to solve a problem? • How can I compare numbers? • How can I follow a checklist to prepare for class? • How can I use technology to complete a math activity? • How can I practice being independent when using online programs?
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? By the end of the lesson, students will: 1. Follow the classroom beginning-of-class checklist with verbal and/or visual prompting as needed. 2. Participate in a five-minute mindfulness activity and review classroom expectations. 3. Demonstrate counting skills during the "What's the Number Wednesday" warm-up. 4. Group 1: Count squares on a graph and communicate the number counted using their AAC devices with teacher support as needed. 5. Group 2: Count squares on a graph and answer comparison questions, including identifying which number is greatest and which is smallest. 6. Access and log into IXL in preparation for the upcoming benchmark. 7. Access and log into Bankability in preparation for the first use of the program

during the week.

8. Demonstrate appropriate participation and work behaviors during individual and small-group activities.

Assessment Evidence/Level of Learning	**Differentiated Instruction:**
Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: Following the beginning-of-class checklist. Participating in mindfulness and classroom expectations. Responding to the "What's the Number Wednesday" counting activity. Using AAC devices to communicate answers when appropriate. Verbally answering questions during the warm-up. Demonstrating the ability to compare numbers for students working at that level. Successfully logging into IXL. Successfully logging into Bankability. Following directions during transitions between activities. Participating appropriately during small-group instruction.	Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. Group 1 – Foundational Skills / Intensive Communication Supports Students in Group 1 use AAC devices to communicate. • Teacher uses both verbal language and her own AAC/talking device to model important vocabulary and directions. • For example, the teacher may verbally say "Go get your folder" while simultaneously selecting "folder" on her AAC device. • Teacher models functional communication such as "hello," "folder," "number," and other relevant vocabulary. • Students use their own AAC devices to communicate answers. • Counting activity focuses on counting the squares on a graph. • Students communicate the number they counted using their AAC devices. • Directions are presented in short, clear steps. • Students receive additional wait time for communication. • Teacher provides prompting as needed and allows students opportunities to respond

	independently. • Visual and verbal supports are provided throughout the lesson. Group 2 – More Independent Learners • Students receive the same general directions but require fewer communication supports. • Students verbally answer questions. • During the counting activity, students count the squares and answer questions such as: o "Which number is biggest?" o "Which number is smallest?" • Students are encouraged to explain their answers when appropriate. • Students work toward greater independence when accessing IXL and Bankability. • Teacher provides prompts or assistance only when necessary. For Both Groups • Students receive access to the same classroom routines. • Students receive individualized prompting based on their needs. • Students are provided opportunities to demonstrate independence before teacher assistance is given. • Expectations are adjusted to students' individual skill levels while maintaining participation in the same lesson.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

The classroom follows a predictable beginning-of-class routine to support organization, independence, and successful transitions.
When students enter:

1. Students refer to the checklist displayed on the board.
2. Students gather their required materials.

3. Students prepare their folders/materials for class.
4. Students participate in a five-minute mindfulness meditation.
5. Students review classroom expectations.
6. Students participate in the warm-up.
7. Students transition into small-group activities.

A positive reinforcement system is used throughout the lesson. Students earn a fake dollar bill when they answer questions, participate appropriately, or demonstrate positive classroom behaviors.
The teacher uses specific positive feedback to reinforce participation and effort.
For students who use AAC, the classroom environment supports multiple forms of communication. Students are given adequate time to use their devices and are not expected to respond verbally when AAC is their established communication method.

Domain III: Instruction

Activate Prior Knowledge/Motivation:
Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

The lesson begins with the familiar classroom checklist. Students are prompted to gather their materials and prepare for class.
The teacher then leads a five-minute mindfulness meditation followed by a review of classroom expectations. This provides a predictable transition into academic instruction and prepares students for learning.
Students then participate in "What's the Number Wednesday," a familiar counting activity from News-2-You. Using a familiar routine helps activate previously practiced counting skills while allowing the teacher to differentiate the level of questions based on each group's needs.
Students are motivated through:

- Familiar classroom routines
- Interactive questioning
- Use of AAC devices
- Digital learning programs
- Positive reinforcement using classroom fake dollar bills
- Opportunities to demonstrate independence

Materials Needed:

- Board/interactive board
- Beginning-of-class checklist
- Student folders
- Calculators if normally used in the classroom
- AAC devices/talking devices
- News-2-You "What's the Number Wednesday" activity
- Graph/counting activity
- Computers/tablets
- IXL accounts
- Bankability accounts

- Fake classroom dollar bills
- Mindfulness meditation
- Classroom expectations
- UNO card game

Vocabulary (New or Review):

- Number
- Count
- More
- Less
- Biggest/greatest
- Smallest
- Number
- Graph
- Square

Sequence of the Lesson:
What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Group 1 – Approximately 45 minutes
1. Arrival/Beginning-of-Class Routine – 5 minutes

- Students enter the classroom.
- Teacher directs students' attention to the checklist on the board.
- Students gather their folders and other required materials.
- Teacher provides verbal and visual/AAC support as needed.
- Teacher models language using her AAC device alongside verbal directions.

Example:
Teacher says:
"Go get your folder."
Teacher simultaneously selects **"folder"** on her AAC device.
This provides students with both verbal language and an AAC model.

2. Mindfulness – 5 minutes

- Students participate in a five-minute mindfulness meditation.
- Teacher provides reminders and prompts as necessary.
- Students transition to the academic portion of class.

3. Classroom Expectations – 3–5 minutes

- Teacher reviews classroom expectations.
- Students listen and/or respond to questions.
- Students are reminded of the classroom reinforcement system.
- Students can earn classroom dollar bills for participation and answering

questions.

4. What's the Number Wednesday – Approximately 10 minutes

- Teacher introduces the News-2-You counting activity.
- Students count the squares on the graph.
- Teacher provides prompts as needed.
- Students use their AAC devices to communicate the number they counted.
- Teacher models relevant math vocabulary through verbal language and AAC.
- Students receive positive reinforcement for participation.

5. Small-Group/Digital Learning Activity – Approximately 15 minutes

Students are divided into smaller groups.

Group A:

Students practice logging into **IXL** in preparation for their upcoming benchmark.

Teacher supports students with:

- Finding the website/program
- Entering login information
- Navigating to the appropriate area
- Troubleshooting login issues
- Increasing independence with the routine

Group B:

Students practice logging into **Bankability** in preparation for using the program later in the week.

Teacher supports students with:

- Accessing the program
- Logging in
- Navigating the platform
- Becoming familiar with the program

6. Groups Switch – Approximately 5 minutes

- Students transition to the other digital learning activity.
- Teacher provides transition reminders and prompts.
- Students practice accessing the second program.

7.Anyone who finishes early can go back and play UNO with TA

Group 2 – Approximately 45 minutes

The same overall routine and lesson structure is used.

1. Beginning-of-Class Checklist – 5 minutes

Students:

- Check the board.
- Gather materials.
- Get their folders.
- Prepare for class.

Teacher encourages greater independence with the routine.

2. Mindfulness – 5 minutes

Students participate in the five-minute mindfulness activity.

3. Classroom Expectations – 3–5 minutes
Teacher reviews classroom expectations and reminds students about the classroom dollar reinforcement system.

4. What's the Number Wednesday – Approximately 10 minutes
Students complete the same News-2-You counting activity.
Students:

- Count the squares on the graph.
- Identify the number represented.
- Answer comparison questions such as:
    - **"Which number is biggest?"**
    - **"Which number is smallest?"**

Teacher asks follow-up questions when appropriate and encourages students to explain their answers.

5. Small-Group/Digital Learning Activities – Approximately 15 minutes
Students are divided into smaller groups.
One group practices logging into **IXL** in preparation for the upcoming benchmark.
The other group practices logging into **Bankability** in preparation for using the program later in the week.
Teacher monitors students' ability to navigate each program and provides assistance as needed.

6. Groups Switch – Approximately 5 minutes
Students switch to the other digital learning activity.
Teacher monitors transitions and supports students in accessing the second program.

7.Anyone who finishes early can go back and play UNO with TA

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Ask questions such as:

- "What did we practice today?"
- "What number did you count?"
- "Which number was the biggest?"
- "Which number was the smallest?"
- "What programs did we practice logging into?"
- "What did you do when you needed help?"

Provide positive feedback for participation and effort.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.

7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
