Lesson Plan Framework

Subject Area: Learning Support Math **Grade Level: 9**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • CC.2.2.7.EE.A.1 (foundational skill per IEP goals): Apply properties of operations to add, subtract, factor, and expand linear expressions, including combining like terms. • CC.2.2.7.EE.B.4: Solve real-life and mathematical problems using numerical and algebraic equations, including two-step linear equations.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do we combine like terms to simplify an expression? • How does solving two-step equations build on what we know about combining like terms?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will practice foundational math skills independently via IXL for progress monitoring. • Students will solve two-step equations as a warm-up/review. • Students will review vocabulary: like terms, coefficient, variable, constant, exponent. • Students will take guided notes and work through examples on combining like terms. • Students will visually identify sets of like terms in class examples by marking them with squares and circles. • Students will review combining like terms through a Gimkit game. • Students will begin independent practice on a combining like terms worksheet.	
Assessment Evidence/Level of Learning Students will show what they know by	**Differentiated Instruction**: Modifications in instruction and

evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • IXL progress-monitoring data • Two-step equation warm-up responses • Vocabulary review responses • Completed guided notes on combining like terms • Accuracy marking squares/circles on like terms in class examples (4-5 problems) • Gimkit performance data • Progress on the independent practice sheet	assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • Visual schedule and timer displayed during IXL to support pacing and predictability • Visual marking system (squares for one set of like terms, circles for the other) gives students a concrete way to sort terms before combining them • Guided notes and examples completed together as a class before independent work begins • Gimkit provides a gamified format with immediate feedback • Teacher support available as students begin the independent practice sheet

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual schedule and timer displayed during IXL

• Clear verbal and visual cues signal transitions between activities

• Positive reinforcement during the squares/circles board activity and Gimkit review

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• (0-15 min) IXL for progress monitoring, with the visual schedule and a timer displayed on the board.
• (15-25 min) Two-step equation warm-up.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

• Visual schedule (board/projector)

- Timer
- Devices for IXL
- Two-step equation warm-up sheet
- Vocabulary review materials
- Combining like terms guided notes
- Board example problems for the squares/circles marking activity
- Devices for Gimkit
- Combining like terms practice sheet

Vocabulary (New or Review):

- Like terms — terms that have the same variable raised to the same power
- Coefficient — the number multiplied by a variable
- Variable — a letter that represents an unknown or changing number
- Constant — a number with no variable attached
- Exponent — review

Sequence of the Lesson:

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

- (25-30 min) Vocabulary review.
- (30-50 min) Combining like terms notes and examples, completed together as a class.
- (50-62 min) Practice: with an example problem on the board, students place a square on one set of like terms and a circle on the other set (4-5 problems).
- (62-69 min) Combining like terms Gimkit review.
- (69-90 min) Students begin a combining like terms independent practice sheet.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- Collect any completed independent practice work.
- Briefly recap how to identify and combine like terms.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
