(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Learning Support Math **Grade Level: 9**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • CC.2.2.7.EE.A.1 (foundational skill per IEP goals): Apply properties of operations to add, subtract, factor, and expand linear expressions, including combining like terms.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • What makes two terms 'like terms'? • How do we combine like terms to simplify an expression?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will determine whether given terms are like terms or not like terms. • Students will review key vocabulary: coefficient, variable, constant, exponent. • Students will practice identifying and combining like terms through a game (Combining Like Terms Uno). • Students will independently combine like terms on a practice worksheet. • Students will review combining like terms through a Gimkit game.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • Accuracy of the post-it note sorting activity (like term vs. not a like term) • Vocabulary review responses • Participation and performance in Combining Like	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • Visual schedule posted showing today's

Terms Uno • Completed combining like terms worksheet • Gimkit performance data	activities and materials • Post-it note sorting activity is hands-on and low-stakes, giving a concrete way to check understanding before the lesson moves on • Vocabulary briefly reviewed right before the game to refresh key terms • Game played in two smaller groups, each with a teacher, to allow more individualized support • Teacher circulates during independent worksheet work to check understanding and answer questions • Gimkit provides a gamified, low-pressure format for additional review

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual schedule displayed showing today's activities and materials needed

• Clear verbal and visual cues signal transitions, especially around the lunch break

• Two smaller groups used for the Uno game, each led by a teacher, to allow more individualized support

• Positive, game-based review environment maintained throughout

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• (0-5 min) Students enter, find their seats, and review the visual schedule showing today's activities and materials needed.
• (5-14 min) Warm-up: each student receives a post-it note with a term on it. With a sample term (2x) on the board, students determine if their term is a like term or not and place it under 'Like Term' or 'Not a Like Term.' Check as a class, then briefly review what makes terms 'like terms.'

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

• Visual schedule (board/projector)
• Post-it notes, each with a term written on it, for the warm-up sorting activity

- Board space labeled 'Like Term' / 'Not a Like Term'
- Combining Like Terms Uno card sets (for two groups)
- Combining like terms practice worksheet
- Devices for Gimkit

Vocabulary (New or Review):
- Like terms — terms that have the same variable raised to the same power
- Coefficient — the number multiplied by a variable
- Variable — a letter that represents an unknown or changing number
- Constant — a number with no variable attached
- Exponent — review

Sequence of the Lesson:
What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

- (14-16 min) Quick review of vocabulary: coefficient, variable, constant, exponent.
- (16-20 min) Explain the rules for Combining Like Terms Uno. Split students into two groups (one with each teacher in the room).
- (20-35 min) Play Combining Like Terms Uno: each student gets 5 cards and can only play a card if it is a like term matching the one played before theirs.
- (35-45 min) Stop before lunch to discuss what was learned and reviewed today. Closing statement: "Today we continued our lesson on combining like terms and we reviewed our vocab again. After lunch we will do more review on combining like terms."
- --- LUNCH ---
- (45-55 min) Quick review on the board of how to combine like terms.
- (55-75 min) Students independently complete a practice worksheet on combining like terms. Teacher circulates to check understanding and answer questions.
- (75-90 min) Once all students finish the worksheet, play a Combining Like Terms Gimkit for extra review.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?
- Wrap up Gimkit and collect the completed worksheet.
- Briefly recap what makes terms 'like terms' and how to combine them.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
