(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Learning Support Math **Grade Level: 9**

Student Name: Grace Dittman

Domain I: Planning and Preparation
PA Standard(s): • CC.2.1.8.E.4 / 8.NS.A.1 (foundational skill per IEP goals): Distinguish between rational and irrational numbers. • CC.2.1.8.E.1 / 8.EE.A.2 (foundational skill per IEP goals): Simplify expressions involving square roots (radicals). • CC.2.2.HS.D.9 / CC.2.2.7.EE.A.1: Apply order of operations to evaluate expressions. • Note: verify alignment with individual students' IEP math goals.
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do we simplify radical expressions? • How can we classify numbers as rational or irrational? • How does order of operations help us evaluate expressions correctly? • What strategies can we use to prepare for an upcoming test?
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will simplify radical (square root) expressions. • Students will classify numbers as rational or irrational. • Students will apply order of operations to evaluate expressions. • Students will complete a test review packet mirroring the test format to prepare for the upcoming assessment.

Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • Participation and performance in the review Jeopardy • Whiteboard/verbal responses during the simplifying radicals warm-up • Gimkit performance data (rational/irrational number game and order of operations game) • Completed test review packet	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • Test review packet mirrors the actual test format/directions to build familiarity and reduce test anxiety • Gimkit provides a gamified format with immediate feedback for both review topics • Brain break video included to support attention and self-regulation mid-period • Teacher circulates and chunks the review packet into sections for students needing extra support or reduced workload • Reference sheet/notes available during packet work as appropriate to individual accommodations

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual schedule displayed showing today's segments, including the lunch break and brain break

• Clear verbal and visual cues signal transitions between activities

• Consistent routine carried over from the prior lesson (Jeopardy continues from where it left off)

• Positive, low-pressure tone maintained during test review to reduce anxiety

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• (0-20/25 min) Finish the review Jeopardy game from the previous lesson.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

- Jeopardy review game (continued from previous lesson)
- Whiteboards, dry-erase markers, calculators
- Devices for Gimkit (rational/irrational numbers game and order of operations game)
- Test review packet (formatted to mirror the actual test)
- "Would You Rather" Halloween edition brain break video
- Projector

Vocabulary (New or Review):

- Radical — a root expression (e.g., a square root)
- Simplify — writing an expression in its simplest form
- Rational number — a number that can be written as a fraction of two integers
- Irrational number — a number that cannot be written as a fraction; a non-repeating, non-terminating decimal
- Order of operations (PEMDAS) — review

Sequence of the Lesson:

- (8 min) Warm-up: 2 simplifying radicals questions completed together.
- (7 min) Gimkit: rational/irrational numbers review game.
- (remaining time until lunch) Students work on the test review packet, formatted to look just like the upcoming test.
- --- LUNCH ---
- Students finish the test review packet.
- (5 min) Brain break: "Would You Rather" Halloween edition video.
- (7 min) Gimkit: order of operations review game.

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- Collect the completed test review packet.
- Briefly recap any commonly missed concepts from Jeopardy, the warm-up, or the Gimkit games.

• Preview the upcoming test and remind students what to bring/review beforehand.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson

efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
