Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Essential Skills **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): PA Career Education and Work Standards (effective July 1, 2026): 13.3.11.A — Evaluate personal attitudes and work habits that support career retention and advancement; 13.2.9-12.E — Evaluate time and project management strategies and their application to both personal and work situations.	
Essential Question(s): Students will consider and reflect on throughout the lesson: What executive functioning skills do I use well, and which skills are areas I can improve?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Complete the Executive Functioning (EF) self-assessment on pages 6–8 of the provided ESS Executive Functioning Packet. • Rate and reflect on current executive functioning skills using the rating system provided in the packet. • Identify at least one executive functioning strength and one skill that could be improved.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: Formative: teacher observation during the check-in, whole-group engagement, and quiz completion; questioning during discussion. Product evidence: completed EF quiz/self-rating on pages 6–8 and a brief verbal or written reflection identifying one strength and one area for growth.	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. Provide the packet digitally or on paper; read directions aloud and clarify unfamiliar vocabulary without changing the intended self-rating. Chunk pages into smaller sections and provide one item at a time as needed. Allow students to respond verbally, point to choices, type, or use assistive technology. Provide extended time and frequent check-ins. Use a visual agenda and explicit modeling. Students ready for enrichment can

	identify a specific school/work situation in which improving one skill would help.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

Begin with the established daily check-in routine. Display a visual agenda and learning target. Review expectations: participate respectfully, answer honestly, and remember that the self-assessment is for identifying strengths and growth areas, not for getting a 'right' or 'wrong' score. Circulate during independent work, offer quiet redirection, and provide breaks when needed.

Domain III: Instruction

Activate Prior Knowledge/Motivation:

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Connect to students' existing routines by asking: 'What is one thing you do every day at school that helps you stay on track?' Briefly explain that executive functioning skills include planning, organization, self-monitoring, and managing tasks. Preview that today's quiz is a chance to notice current strengths and areas for growth.

Materials Needed:

Daily check-in form; ESS Executive Functioning Packet, pages 6–8; pencils; computers/tablets if using a digital copy; projector/display; optional highlighters or sticky notes.

Vocabulary (New or Review):

Executive functioning; self-assessment; self-reflection; organization; planning; self-monitoring; time management; task completion; strength; growth area.

Sequence of the Lesson:

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

• 0–5 min — Daily check-in: Students complete the established daily check-in. Teacher briefly reviews any immediate needs and reminds students of the objective.
• 5–20 min — Whole-group engagement: Prompt students to name or identify examples of executive functioning skills they use at school. Teacher records examples and connects them to the lesson.

• 20-25 min — Introduce the lesson: Explain that students will complete an EF self-assessment and that honest answers are more useful than answers they think the teacher wants.
• 25-55 min — EF quiz/self-rating: Students complete pages 6–8 of the ESS Executive Functioning Packet. Teacher models how to interpret the rating scale and circulates to clarify directions and provide individualized support.
• 55-60 min — Review and reflection: Students review their responses and identify one area they feel confident about and one area they would like to improve. Students may share verbally, write, or type.
• 60-65 min — Individual teacher check-ins: Teacher briefly conferences with students to connect a growth area to a real school situation.
• 65-75 min — Transition/cleanup: Students turn in or save their completed work and prepare for dismissal.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Students complete: 'One executive functioning skill I am proud of is ___, and one skill I want to work on is ___.' Preview that the class will use self-awareness to examine situations that can make it harder to stay regulated and successful.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
