Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Essential Skills **Grade Level: 9-12**

Student Name: Grace Dittman

<table>
<tr><th colspan="2">Domain I: Planning and Preparation</th></tr>
<tr><td colspan="2">PA Standard(s): PA Career Education and Work Standards (effective July 1, 2026): 13.3.11.A — Evaluate personal attitudes and work habits that support career retention and advancement. PA Career Ready Skills: Self-Awareness and Self-Management — recognize feelings and respond effectively to challenges.</td></tr>
<tr><td colspan="2">Essential Question(s):
How can knowing my triggers help me choose a strategy before a situation becomes harder to manage?</td></tr>
<tr><td colspan="2">Objectives/Performance Expectations
What will students know and be able to do as a result of this lesson?
• Define a trigger as something that can cause a sudden emotional response.
• Identify personal situations or events that may lead to irritation, upset, anger, sadness, or another strong emotional response.
• Rank three common triggers by frequency or intensity and identify a strategy that may help in a school setting.</td></tr>
<tr><td>Assessment Evidence/Level of Learning
Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:
Formative: responses during the whole-group discussion, teacher questioning, and observation of student participation. Product evidence: completed trigger list with a top-three ranking and at least one appropriate school-based strategy for the highest-priority trigger.</td><td>Differentiated Instruction:
Modifications in instruction and assessment for students with learning differences, specifically those with 504’s and IEP’s.
Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted.

Normalize a range of emotions while maintaining the expectation that students are responsible for their actions. Offer examples and non-personal hypothetical situations so students can participate without disclosing sensitive information. Allow students to write, type, select from choices, or respond verbally. Provide a partially completed organizer, sentence starters, visual strategy</td></tr>
</table>

	choices, and private teacher support. Students ready for enrichment may identify multiple strategies and explain when each might be useful.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

Use a calm, predictable structure and remind students that sharing is optional. Establish a respectful discussion norm: no laughing at, judging, or repeating another student's personal information. Students may pass or use a hypothetical example. Teacher models neutral language and focuses on problem-solving rather than blame.

Domain III: Instruction

Activate Prior Knowledge/Motivation:

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Ask students to recall yesterday's idea of identifying strengths and areas for growth. Introduce the idea that self-awareness also includes noticing situations that make it harder to use our skills. Give a neutral example, such as being asked to stop a preferred activity unexpectedly, and ask what feelings or actions might occur.

Materials Needed:

Daily check-in form; trigger/strategy graphic organizer or paper; projector/display; pencils/computers; optional emotion scale or visual feelings chart; strategy choice cards.

Vocabulary (New or Review):

Trigger, emotion, behavior, irritation, upset, strategy, coping strategy, self-management, intensity, frequency

Sequence of the Lesson:

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

• 0–5 min — Daily check-in: Students complete the routine. Teacher briefly identifies any classroom needs that may affect participation.
• 5–20 min — Group engagement activity: Complete a short, low-risk activity about

emotions or self-management, such as matching common situations with possible feelings. Emphasize that different people can have different reactions to the same event.
• 20-30 min — Direct instruction: Explain that triggers are events or situations that can lead to a sudden emotional response. Reinforce: emotions are not 'bad' or 'wrong,' but students remain responsible for how they respond or act.
• 30-35 min — Model: Teacher models a hypothetical trigger, identifies the feeling/response, and demonstrates choosing a strategy.
• 35-45 min — Independent reflection: Students list situations that can make them irritated, upset, angry, sad, or otherwise emotionally activated. Students may use personal or hypothetical examples.
• 45-55 min — Prioritize: Students identify their top three triggers based on how often they occur or how strongly they affect them. The highest-priority trigger is labeled #1.
• 55-65 min — Strategy planning: Next to the #1 trigger, students identify what they typically experience and one strategy they can use at school. Teacher conferences and helps students choose realistic strategies.
• 65–75 min — Share/transition: Volunteers share a general strategy, not a personal trigger. Students clean up materials.

Closure: Students complete: 'When I notice ___, I can try ___.' Reinforce that recognizing a trigger is a first step toward making a more intentional choice about a response. Preview that the next lesson will focus on meeting new people and starting conversations.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
