Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Essential Skills **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): PA Career Education and Work Standards (effective July 1, 2026): 13.2.9-12.E — Evaluate time and project management strategies and their application to both personal and work situations; 13.3.11.A — Evaluate personal attitudes and work habits that support career retention and advancement.	
Essential Question(s): How can an organization reset help me finish the week prepared for the next one?	
Objectives/Performance Expectations: • Complete the daily Google Form check-in. • Review materials and identify unfinished schoolwork that needs attention. • Organize a backpack and/or locker using an appropriate system. • Participate appropriately in a structured choice activity after required tasks are complete.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: Formative: teacher observation of chick-in completion, work review, organization behaviors, and student use of an organization system. Product evidence: completed check-in, completed or documented work tasks, and organized backpack/locker. Teacher may use a simple checklist to document independence and level of prompting.	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. Provide a visual Friday checklist with tasks in order. Allow students to complete organization tasks one area at a time. Provide adult prompting, modeling, and organization support when included in the student's IEP or classroom plan. Offer sorting categories such as 'Keep,' 'Take Home,' 'Turn In,' and 'Needs Attention.' Allow alternative storage

	systems for students who have difficulty managing a backpack or locker. For enrichment, students can create a personal weekly organization routine or identify one change that would make next week easier.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

Use a predictable end-of-week routine: check-in - unfinished work - organization reset - choice activity. Establish clear criteria for moving to games: required academic and organization tasks must be completed or appropriately documented. Maintain a calm, positive environment and reinforce independence rather than speed.

Domain III: Instruction

Activate Prior Knowledge/Motivation:

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Ask students to think about what happens when papers, assignments, or materials are difficult to find. Connect Friday's organization reset to Monday's self-assessment and the class's ongoing focus on executive functioning. Explain that organization is a habit that can make school and work responsibilities easier to manage

Materials Needed:

Daily Google Form, student computers, unfinished assignments/materials, backpacks, lockers if applicable, organization checklist, folders, labels or sorting categories as appropriate, board games, UNO, puzzles, LEGOs, or other classroom-approved choice activities.

Vocabulary (New or Review):

Organization, reset, unfinished work, priority, checklist, routine, materials, sort, organize, independent, responsibility.

Sequence of the Lesson:

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

- 0–5 min — Daily Google Form check-in: Students complete the form and review the day's checklist.
- 5–15 min — Work completion check: Students review assignments, folders, digital work, and teacher directions. Teacher helps students identify what is finished, what is missing, and what needs to be completed or addressed.

- 15-50 min — Complete/organize: Students complete priority work when possible and/or organize materials needed for upcoming classes. Teacher uses a checklist and prompts students to work independently before providing more direct assistance.
- 50-55 min — Backpack/locker reset: Students organize their backpack and locker if applicable. Suggested categories include 'Keep at school,' 'Take home,' 'Turn in,' and 'Needs attention.' Teacher checks for a functional system rather than appearance alone.
- 55-70 min — Structured choice activity: Once required tasks are complete, students may choose from approved games and activities such as UNO, Monopoly, puzzles, LEGOs, or board games. Teacher observes cooperation, communication, and following classroom expectations.
- 70-75 min — Clean-up and weekly reflection: Students return materials and identify one organization habit they want to use next week.

Closure: Students answer: 'What is one thing I organized today that will make next week easier?' Reinforce that the Friday reset is part of a weekly routine and preview that the class will continue building executive functioning skills the following week.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
