Lesson Plan Framework

Subject Area: Essential Skills and Strategies (ESS) **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • PA SEL Competency — Relationship Skills: Use communication and social skills to interact effectively with others, including active listening, turn-taking, and staying on topic during group interactions. • PA Career Education and Work Standard 13.3.11.B: Analyze the importance of collaboration and group participation skills in school, work, and community settings.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • Why is it important to be able to work well in groups? • What does working well in a group look like in school, at work, and in the community?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will identify key group-participation skills: listening, sharing ideas, not talking over others, and staying on topic. • Students will connect the conversation ball activity to real-life group work skills. • Students will identify examples of situations that require working in groups in school, at work, and in the community. • Students will share a personal experience related to working in a group.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504′s and IEP′s. Extensions/Enrichment in instruction

• Participation in the conversation ball activity, including turn-taking and responding to follow-up questions • Verbal identification of the group skills used during the activity • Participation in the discussion of school/work/community group examples • Sharing of a personal group-work experience	and assessment for students who are above grade level and/or gifted. • Visual schedule posted and referenced for predictability • Conversation ball provides a physical, turn-based cue so students know when it's their turn to speak • Teacher models follow-up questions to scaffold conversational engagement for students who need support extending their answers • Concrete, real-world examples (school/work/community) used to make the group-work concept concrete rather than abstract • Option to pass during personal sharing • Choice of homework or a game during work time to accommodate individual pacing/needs

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual schedule displayed and referenced at the start of class

• Consistent daily routine: check-in → Wordle → conversation ball → group skills lesson → discussion → work time

• Group norms reinforced during the conversation ball: one person talks at a time, listen to whoever is holding the ball, ask follow-up questions

• Positive reinforcement for using group skills (listening, staying on topic) during discussion

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• (0-5 min) Students enter, follow the schedule on the board, and complete their daily check-in.
• (5-15 min) Wordle completed together as a group.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

- Visual schedule
- Daily check-in sheet or digital tool
- Wordle (device/board)
- Conversation ball
- Discussion prompts/examples for school, work, and community group scenarios
- Homework materials and/or games (Uno, Monopoly, etc.) for end-of-period work time

Vocabulary (New or Review):

- Listening — paying attention to what someone else is saying
- Staying on topic — saying something that connects to what's already being discussed
- Collaboration — working together with others toward a shared goal

Sequence of the Lesson:

- (15-25 min) Group engagement activity: pass around the conversation ball. Each student answers the question their thumb lands on; everyone gets a turn. The class asks follow-up questions to each person's answer.
- (25-35 min) Transition into the lesson: explain that the conversation ball activity was practice for working in groups, since students listened, shared their ideas, didn't talk over their classmates, and stayed on topic.
- (35-45 min) Review examples of when working in groups is needed: in school, at work, and in the community.
- (45-55 min) Students share a personal experience of a time they needed to work in a group.

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- (55-90 min) Work time: students choose to work on homework or play a game (Uno, Monopoly, etc.).
- Briefly recap that everyone practiced the same group skills today (listening, sharing, staying on topic) that they'll need in school, at work, and in the community.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
