(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Essential Skills and Strategies (ESS) **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • PA Career Education and Work Standard 13.3.11.B: Analyze the role of personal management skills (e.g., organization, responsibility, self-advocacy) in achieving personal and academic success. • Note: verify alignment with individual students' IEP goals related to executive functioning/organization, since this is a recurring routine-based skill-building period rather than new academic content.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • How does staying organized and on top of responsibilities help me succeed in and out of school? • What strategies can I use to manage my time, my materials, and my responsibilities independently?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will complete a daily check-in routine. • Students will identify whether they have missing assignments and use class time to complete them. • Students will organize their binder, backpack, and/or locker using an organizational system when materials need it. • Students will demonstrate appropriate, responsible use of free-choice time once responsibilities are complete.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's.

• Completion of daily check-in • Participation in the group engagement activity • Missing-work completion log/tracking • Binder/backpack/locker organization checklist • Teacher observation of on-task behavior and appropriate choices during work/free-choice time	Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • Visual schedule and routine chart posted and referenced daily for predictability • Individualized, up-to-date missing-assignment list provided for each student • Choice of organizational tools/systems (folders, color-coding, checklists, digital planner) based on student need • Clear, posted expectations and modeled examples for appropriate free-choice activities (voice level, sharing, cleanup) • Teacher check-ins throughout the period to support self-monitoring and decision-making about which task to prioritize • Task-card or checklist system showing the sequence of steps (check-in → group activity → missing work check → organize/work/free choice) for students who benefit from concrete sequencing

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual schedule/routine posted and used daily so the structure is predictable

• Consistent daily routine: check-in → group engagement activity → missing work check → organize/work/free choice time → closure

• Positive reinforcement for completing responsibilities (check-in, missing work, organization) before accessing free-choice time

• Established norms for free-choice/game time: respectful volume, sharing materials, cleaning up before the period ends

• Teacher circulates throughout independent work time to check in, redirect, and support decision-making

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• (0-5 min) Students enter, review the visual schedule, and complete their daily check-in.
• (5-20 min) Whole-group engagement activity: Wordle, Contexto, or the Sets game, played and discussed together to start class with a shared, low-pressure warm-up.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

• Visual schedule/routine chart
• Daily check-in sheet or digital tool
• Wordle/Contexto/Sets game (board or device access)
• Individual missing-assignment list per student
• Organizational supplies: folders, binders, labels, organization checklists
• Board/card games for free-choice time (Uno, Monopoly, etc.)

Vocabulary (New or Review):

• Self-management — the ability to monitor and take responsibility for your own tasks and behavior
• Prioritize — deciding what needs to be done first
• Organizational system — a consistent method for keeping materials in order (e.g., folders, labels, checklists)
• Accountability — following through on responsibilities

Sequence of the Lesson:

• (20-25 min) Missing work check: students individually review their missing-assignment list to determine whether they have work to complete.
• (25-80 min) Work time, based on individual need:
• - If a student has missing work, they use this time to complete it, with teacher support available.
• - If a student is caught up but their binder, backpack, or locker needs organizing, they use this time to organize using the checklist/system provided.
• - If a student has completed both missing work and organization, they may choose an appropriate game (Uno, Monopoly, etc.) to play independently or with a peer.
• (80-88 min) Work time continues; teacher circulates to check progress, redirect as needed, and confirm students have appropriately completed responsibilities before choosing free time.

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- Students clean up any games or materials used during the period.
- Quick check-out: each student shares one thing they accomplished today (verbally or on an exit slip) — completed an assignment, organized materials, etc.
- Preview that tomorrow will follow the same daily routine.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
