Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Learning Support Math **Grade Level: 9**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • CC.2.2.HS.D.9 / CC.2.2.7.EE.A.1: Evaluate algebraic expressions using substitution and order of operations, including absolute value. • CC.2.1.8.E.4 / 8.NS.A.1: Distinguish between rational and irrational numbers. • CC.2.1.8.E.1 / 8.EE.A.2: Simplify expressions involving square roots (radicals).	
Essential Question(s): Students will consider and reflect on throughout the lesson: • How can we review and demonstrate what we've learned about evaluating expressions, order of operations, absolute value, rational/irrational numbers, and simplifying radicals? • How can I use accommodations and reference tools to show my best understanding on a test?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will review Unit 1 topics through a guided test review packet (2 questions per topic, 16 total). • Students will review Unit 1 topics through review Gimkit games. • Students will independently complete the Unit 1 test, using accommodations as needed (small group setting, read-aloud, calculator reference sheet).	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who

• Completed test review packet (16 questions, 2 per Unit 1 topic) • Gimkit performance data • Unit 1 test score/completion	are above grade level and/or gifted. • Test review packet completed together as a class/guided to check understanding before independent testing • Small group testing setting (built in, as the class has 8 students) • Test questions read aloud as needed • Calculator functions reference sheet provided to all students • Additional individualized accommodations (e.g., extended time) provided per IEP as needed

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual schedule displayed showing today's segments: review packet, Gimkit, lunch, and test

• Calm, quiet, focused environment established for the post-lunch testing block

• Clear expectations reviewed before testing begins (independent work, no talking, raise hand for help)

• Materials (calculator reference sheets, test copies, accommodation materials) organized and ready before the test begins

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• (0-30 min) Test review packet: complete together as a class, covering 2 questions per Unit 1 topic (16 total), checking for understanding throughout.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

• Test review packet (16 questions, 2 per Unit 1 topic)
• Calculators
• Devices for Gimkit

• Unit 1 test copies
• Calculator functions reference sheet
• Additional accommodation materials as needed (read-aloud support, extended time signage, etc.)

Vocabulary (New or Review):

• Evaluate, substitute, order of operations, absolute value, rational number, irrational number, radical, simplify — review of Unit 1 vocabulary

Sequence of the Lesson:

• (30-45 min) Review Gimkits covering Unit 1 topics.
• --- LUNCH ---
• (45-90 min) Unit 1 Test: students independently complete the test. Since the class has 8 students, this naturally serves as a small-group testing accommodation. Additional accommodations provided as needed: questions read aloud, calculator functions reference sheet available to all students.

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

• Collect completed tests.
• Briefly preview the next unit of study.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
