(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math (Money Monday) Grade Level: 9-12

Student Name: Grace Dittman

Domain I: Planning and Preparation
PA Standard(s): • Functional Math: Count objects on a pictograph and identify the matching number; add prices to find a total cost. • PA Career Education and Work Standard 13.3.11.B: Apply functional math and consumer skills needed for independent living. • Note: verify alignment with individual students' IEP/PASA goals for functional math and AAC communication.
Essential Question(s): Students will consider and reflect on throughout the lesson: • How can we count the pictures on a graph and show the correct number? • How do we add up prices to find the total cost of a list of groceries?
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Both groups: Students will participate in a mindfulness meditation, review the class expectations, and learn the ASL sign of the week: 'pay.' • Group 1 (AAC users): Students will count the number of pictures on a graph by pointing or using their AAC device, then choose the correct number from a list. • Group 1: Students will share their response to the class expectations using their AAC device. • Group 2: Students will add the prices of the items on their grocery list to find the total cost and write the total on the board. • Group 2: Students will complete daily progress monitoring.

Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • Group 1: accuracy counting the pictures on the graph and choosing the correct number from the list • Group 1: participation sharing about the expectations on the AAC device • Group 2: accuracy adding the prices on their grocery list and writing the correct total on the board • Group 2: progress monitoring data • Both groups: participation in meditation, expectations, and the sign of the week	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • Group 1: students may respond by pointing or by using their AAC device • Group 1: choosing the answer from a list gives a clear, structured way to show their count • Group 1: AAC device used to share thoughts on the class expectations • Group 2: each student receives their own individual grocery list matched to their level • Visual schedule and consistent warm-up routine maintained for predictability

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual schedule displayed showing today's routine for each group

• Calm, quiet environment maintained during the meditation

• Clear transition between Group 1 and Group 2 blocks

• Group 1's schedule accounts for leaving early for speech

Domain III: Instruction

Activate Prior Knowledge/Motivation:

• GROUP 1 — AAC users:

• Warm-up routine: mindfulness meditation; students read the class expectations and share on their AAC device; ASL sign of the week introduced: 'pay.'

• Group 1 does not do a Money Monday warm-up today and goes right into the pictograph lesson.

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Materials Needed:

- Visual schedule (board/projector)
- Mindfulness meditation video
- Class expectations
- AAC devices (Group 1)
- ASL sign of the week reference ('pay')
- Graph with pictures to count, plus a list of answer choices (Group 1)
- List of grocery items with prices on the board (Group 2)
- Individual grocery lists for each student (Group 2)
- Progress monitoring tool/program (Group 2)

Vocabulary (New or Review):

- Pay — ASL sign of the week
- Pictograph — a graph that uses pictures/symbols to represent data
- Count — review
- Price / total — review
- Add — review

Sequence of the Lesson:

- Pictograph lesson, Group 1: students come up to the graph and point or use their AAC device to count the number of pictures. After counting, they choose the correct number from a list. This is all Group 1 has time for, since they leave early for speech.
- GROUP 2 — no AAC devices:
- Warm-up routine: mindfulness meditation; students read the class expectations; ASL sign of the week introduced: 'pay.'
- Money Monday warm-up: a list of grocery items with prices is on the board, and each student receives a list of the items they will be buying. Students add up the prices to find the total cost of their list and write the total on the board.
- Progress monitoring for Group 2.

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- Group 1: quick recap of the number counted if time allows before leaving for speech.
- Group 2: briefly review a few of the totals written on the board and discuss how they were found.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the

lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
