Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level: 9-12**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): Pennsylvania Academic Standards for Mathematics, Numbers and Operations: applying number concepts and operations in real-world contexts. This lesson supports functional mathematics, financial literacy, communication, and independent-living skills.	
Essential Question(s): Students will consider and reflect on throughout the lesson: How much are these coins worth? How can I use money to complete everyday financial tasks? How can I communicate what I know about money?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? Students will know how to tell the value of coins Students will know how to properly fill out a check Students will show they can work independently through progress monitoring	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • Group 1: progress monitoring data • Group 2: completed money word problems/filled out check • Group 2: progress monitoring data • Observation of following the daily routine and expectations	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • Group 1: AAC device vocabulary (yes/no, coin value) modeled by the teacher before independent use • Group 1: mindfulness video and class expectations modeled using the AAC device to reinforce communication

	• Group 1: cwarm-up coin counting slides use pictures, with low, simple value • Group 2: task is more complex, recall information from last weeks lesson, matched to their higher independence level • Group 2: visible timer displayed during snack/break to support predictability • Visual schedule and materials list posted for both groups • Progress monitoring tailored to each student's goals

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual routine and materials list (math folder, laptop, pencil) posted on the board

• Group 1 greeted individually at the start of their block, modeled with the AAC device

• Timer displayed on the board during Group 2's snack/break

• Clear transition between groups

• Calm, patient environment maintained during AAC modeling and mindfulness video

Domain III: Instruction

Activate Prior Knowledge/Motivation:

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

The familiar Money Monday routine activates prior knowledge about coins and money. Group 2's check activity reviews the check-writing skill introduced the previous week. The banking theme connects mathematics to meaningful real-world financial tasks.

Materials Needed:

Math folder, projector, YouTube, Canva slideshow, progress monitoring for each student, fake money, money Monday warm-up, AAC device, student laptops, teacher laptop, pencil, timer

Vocabulary (New or Review):

Money; coin; value; cents; dollar; count; total; deposit; check; amount; progress monitoring.

Sequence of the Lesson:
What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Group 1 — 45 minutes

- Materials
- Mindfulness
- Expectations
- ASL "deposit"
- Money Monday coin-counting
- Progress monitoring

Group 2 — 45 minutes

- 10-minute snack/leisure
- Materials
- Mindfulness
- Expectations
- ASL "deposit"
- Money Monday word problem + check
- Progress monitoring

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Group 1: Teacher briefly reviews the coin-counting skill practiced during Money Monday and asks students to identify or communicate one money skill they practiced.
Group 2: Teacher reviews the money word problem and check-writing activity and asks students to identify one skill they practiced.

Connection to Next Lesson: Teacher connects the lesson to continued work with money, banking, and functional math skills.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?

5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
