Lesson Plan Framework

Subject Area: Life Skills Math (Bankability Prep) Grade Level: 9-12

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • PA Career Education and Work Standard 13.3.11.B: Analyze consumer and personal finance skills, including tracking account balances, bills, and budgeting for purchases, needed for independent living. • Functional Math: Add savings and checking account balances to determine total available funds; compare prices to available funds to make spending/saving decisions.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do we keep track of money in a savings and checking account? • How can we decide whether to spend or save our money?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will log into Digitability and identify the balances in their savings and checking accounts. • Students will add their savings and checking balances to determine their total available money. • Students will identify whether they have any bills to pay and the amount owed. • Students will decide whether they want to shop at tomorrow's Bankability store, based on their available funds. • Students will compare prize prices to their available funds to decide if they can afford an item or need to save for something more expensive. • Students will learn the ASL sign of the week: 'deposit.'	
Assessment Evidence/Level of	**Differentiated Instruction**:

Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • Completed 'Fun Friday' Bankability sheet (account balances, total, bills, shopping decision) • Accuracy adding savings and checking account balances • Participation in the ASL sign of the week • Participation in the Digitability lesson	Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • Group 1 (AAC users): Digitability walkthrough and Fun Friday sheet supported with visuals/AAC device use • Group 2: more independent login and navigation of Digitability, with more complex budgeting reasoning (e.g., saving for a more expensive item) • Teacher models the Fun Friday sheet process step-by-step before independent work • Visual schedule and consistent routine maintained for predictability

Domain II: Classroom Environment:
Describe Classroom/Behavior Management Plan & Routines

• Visual schedule displayed showing today's routine for each group

• Group 2 has a snack break upon entering, consistent with established routine

• Clear transition between Group 1 and Group 2 blocks

• Consistent weekly routine of reviewing an ASL sign of the week

Domain III: Instruction

Activate Prior Knowledge/Motivation:
Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

• GROUP 1 — AAC users:
• (entry) Students enter, gather materials, and complete their usual warm-up routine.
• (sign of the week) Introduce and demonstrate the ASL sign for 'deposit.'

Materials Needed:

- Visual schedule (board/projector)
- AAC devices (Group 1)
- Devices with Digitability access
- 'Fun Friday' Bankability worksheet
- ASL sign of the week reference ('deposit')
- List of Bankability store prize prices

Vocabulary (New or Review):

- Deposit — ASL sign of the week; adding money into an account
- Savings account / checking account — review
- Bill — an amount of money owed
- Balance / total — review

Sequence of the Lesson:

What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

- (digitability lesson) Short lesson on logging into and navigating Digitability.
- (fun friday sheet) Students log into Digitability, check their savings and checking account balances, add the two together for a total, check for any bills and record the amount owed, and decide whether they want to go shopping tomorrow at the Bankability store. Students may look at the prize prices listed to decide what they can afford or whether to save for something more expensive.
- GROUP 2 — no AAC devices:
- (entry) Students have a snack break upon entering.
- (warm-up) Students complete their usual warm-up routine.
- (sign of the week) Introduce and demonstrate the ASL sign for 'deposit.'
- (digitability lesson) Short lesson on logging into and navigating Digitability, with more independent navigation expected.
- (fun friday sheet) Students independently log into Digitability, check their account balances, add them for a total, check for bills, and decide whether to shop at tomorrow's Bankability store, comparing prize prices to their available funds.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

- Briefly recap: how much money do you have, and what did you decide about shopping tomorrow?
- Preview that tomorrow's Bankability store will use the decisions made on today's Fun Friday sheet.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
