Gwynedd Mercy University-School of Business & Education
(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Learning Support Math **Grade Level:** 9th

Student Name: Grace Dittman

<table>
<tr><th colspan="2">Domain I: Planning and Preparation</th></tr>
<tr><td colspan="2">PA Standard(s):
• CC.2.1.7.D.1: Analyze proportional relationships and use them to solve real-world and mathematical problems.</td></tr>
<tr><td colspan="2">Essential Question(s):
Students will consider and reflect on throughout the lesson:
• What is a proportion?
• How can I use a proportion to find a missing number?
• How can I check that my answer makes sense?</td></tr>
<tr><td colspan="2">Objectives/Performance Expectations
What will students know and be able to do as a result of this lesson?
Students will be able to:
• Copy and use notes on proportions.
• Solve proportion problems with support, starting with examples done together.
• Complete a proportions practice worksheet.</td></tr>
<tr><td>Assessment Evidence/Level of Learning
Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:
• Practice data: IXL recommendations during the first 15 minutes.
• Formative: Student answers as we go through the notes questions together on the board.
• Formative: Practice worksheet on proportions, with my observation and help as I circulate.</td><td>Differentiated Instruction:
Modifications in instruction and assessment for students with learning differences, specifically those with 504’s and IEP’s.
Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted.
• Supports: The visual schedule and timer show students what comes next.
• Content: Notes are on the board for students to copy, so everyone has the same notes.
• Process: We go through the notes questions together on the board and do the first few worksheet problems together.
• Process: I circulate to help the students who need it.
• Process: IXL recommendations are</td></tr>
</table>

	personalized to each student. • **Environment:** Students get a 5-minute break before lunch. • **IEP/504:** Accommodations in each student's IEP/504 plan will be followed.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

- The visual schedule is on the board when students enter, so they know they start with 15 minutes of IXL.
- A timer on the board shows how much IXL time is left.
- Students copy notes from the board, and we go through the questions together.
- Students take a 5-minute break before lunch.
- After lunch we finish the notes and start the practice worksheet together, then students work while I circulate.

Domain III: Instruction

Activate Prior Knowledge/Motivation:
Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Students start with IXL, which they know well. The notes and the questions we do together on the board introduce proportions, and the first few worksheet problems are done together so students can see the steps before they try on their own.

Materials Needed:

Visual schedule, board, timer, student devices for IXL, proportion notes, paper and pencils, proportions practice worksheet

Vocabulary (New or Review):

Ratio; proportion; equivalent; cross multiply; missing number; check

Sequence of the Lesson:
What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Arrival and IXL — 15 minutes

- The visual schedule is on the board, and students see they start with 15 minutes of IXL.

- Students work on their IXL recommendations with a timer on the board.

Proportion Notes

- Transition to proportion notes.
- The notes are on the board and students copy them.
- We go through the questions together on the board.

Break — 5 minutes before lunch

Lunch

After Lunch

- We finish the notes.
- We go through the proportions practice worksheet. We do the first few problems together.
- Students continue the worksheet while I circulate to help those who need it.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

At the end of class, I ask students to tell me what a proportion is and one step they used to solve one. I look at the worksheets to see who needs more practice. Connection to Next Lesson: Students continue practicing proportions.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
