Lesson Plan Framework

Subject Area: Learning Support Math **Grade Level: 9**

Student Name: Grace Dittman

Domain I: Planning and Preparation	
PA Standard(s): • CC.2.2.HS.D.9 / CC.2.2.7.EE.A.1 (foundational skill per IEP goals): Evaluate algebraic expressions by substituting given values for variables and applying order of operations, including expressions with absolute value.	
Essential Question(s): Students will consider and reflect on throughout the lesson: • How do we evaluate algebraic expressions using substitution and order of operations? • How does absolute value affect the value of an expression?	
Objectives/Performance Expectations What will students know and be able to do as a result of this lesson? • Students will practice foundational math skills independently via IXL for progress monitoring. • Students will evaluate algebraic expressions using substitution and order of operations. • Students will evaluate expressions involving absolute value. • Students will demonstrate understanding of evaluating expressions, absolute value, and order of operations through practice and game-based review.	
Assessment Evidence/Level of Learning Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning: • IXL progress-monitoring data • Whiteboard responses during the warm-up (informal check for understanding)	**Differentiated Instruction**: Modifications in instruction and assessment for students with learning differences, specifically those with 504's and IEP's. Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted. • Visual schedule and visible timer displayed

• Gimkit performance data • Completed practice worksheet (absolute value, order of operations, evaluating expressions) • Participation and performance during review Jeopardy	during IXL to support pacing and predictability • Whiteboards used during the warm-up for low-stakes practice and quick teacher checks • Calculators permitted throughout for computation support • Gimkit provides a gamified format with immediate feedback • Jeopardy played in teams/pairs to reduce individual pressure, with the option to confer before answering • Reduced problem set or extended time available on the practice worksheet as needed

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

• Visual schedule displayed showing today's segments, including the lunch break

• Timer displayed during IXL to support time awareness

• Whiteboards, markers, and calculators distributed efficiently before the warm-up begins

• Clear verbal and visual cues signal transitions between each activity

• Positive, team-based structure established for the review Jeopardy

Domain III: Instruction

Activate Prior Knowledge/Motivation:

Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

• (0-15 min) IXL for progress monitoring, with the visual schedule and a timer displayed on the board.

Materials Needed:

• Visual schedule (board/projector)
• Timer
• Devices for IXL
• Whiteboards, dry-erase markers, calculators
• Gimkit set on evaluating expressions (device access)

• Practice worksheet: absolute value, order of operations, and evaluating expressions
• Review Jeopardy game (board/slides)

Vocabulary (New or Review):
• Evaluate — to find the value of an expression
• Substitute — replacing a variable with a given number
• Absolute value — the distance a number is from zero, always positive
• Order of operations (PEMDAS) — the order in which operations must be performed

Sequence of the Lesson:
What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

• (15-25 min) Warm-up: 4 evaluating-expressions questions completed together on the board. Students follow along using whiteboards and calculators.
• (25-32 min) Gimkit review game on evaluating expressions.
• (32-45 min) Practice worksheet covering absolute value, order of operations, and evaluating expressions.
• --- LUNCH ---
• (45-90 min) Review Jeopardy covering evaluating expressions, absolute value, and order of operations for the remainder of class.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?
• Wrap up Jeopardy with a quick recap of the most commonly missed questions/concepts.
• Collect the practice worksheet.
• Preview the next lesson or upcoming assessment on these topics.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
