(*Must be used for each lesson observed by University Supervisor*)
Lesson Plan Framework

Subject Area: Life Skills Math **Grade Level:** 9-12

Student Name: Grace Dittman

<table>
<tr><th colspan="2">Domain I: Planning and Preparation</th></tr>
<tr><td colspan="2">PA Standard(s):
CC.2.4.3.A.4: Represent and interpret data using tally marks and bar graphs.
IEP goals: Students use their AAC device or their voice to communicate, following each student’s IEP goals.</td></tr>
<tr><td colspan="2">Essential Question(s):
Students will consider and reflect on throughout the lesson:
How can tally marks help me count votes?
How does a bar graph show which choice got the most votes?
How can our votes help us plan our community trip?</td></tr>
<tr><td colspan="2">Objectives/Performance Expectations
What will students know and be able to do as a result of this lesson?
Students will be able to:
Group 1: Color in a bar graph to show the number of votes for each shopping place and restaurant.
Group 2: Count the votes, make tally marks, and fill in a bar graph showing the votes for each shopping place and restaurant.
Both groups: Use the graph to see which choices got the most votes for our community-based instruction (CBI) trip.</td></tr>
<tr><td>Assessment Evidence/Level of Learning
Students will show what they know by evidence of/list names of formative or summative checks, quizzes, tests which indicate evidence of learning:
Group 1: Student work coloring in the bar graph.
Group 2: Student vote counts, tally marks, and filled-in bar graph.
Both groups: Observation of AAC use or verbal responses during the expectations and the video.</td><td>Differentiated Instruction:
Modifications in instruction and assessment for students with learning differences, specifically those with 504’s and IEP’s.
Extensions/Enrichment in instruction and assessment for students who are above grade level and/or gifted.
Content: Students already voted, so the graph uses their own choices.
Content: The BrainPOP video on voting and tallies gives students pictures and spoken information.
Process: Group 1 colors in the bar graph, and Group 2 counts, tallies, and fills in the</td></tr>
</table>

	graph. • **AAC:** I model my AAC device while giving directions. • **Process:** Adult support is given as each student needs it. • **IEP/504:** Accommodations in each student's IEP/504 plan will be followed.

Domain II: Classroom Environment:

Describe Classroom/Behavior Management Plan & Routines

- Class is shorter today, so we skip the warm-up.
- Same routine as usual: meditation, then expectations.
- Both groups watch the BrainPOP video before starting.
- Students vote on a trip they are about to take, so the work has a real purpose.
- Adults give help as needed.

Domain III: Instruction

Activate Prior Knowledge/Motivation:
Preparing students for the lesson: How will you activate prior knowledge, build background, or review previous lessons as well as motivate students for the lesson?

Students voted on where they want to go for the upcoming CBI trip to shop for Christmas and eat lunch. Today they use their own votes to make a graph, which connects the math to a real trip they are looking forward to.

Materials Needed:

Meditation, classroom expectations, students' AAC devices, teacher AAC device, BrainPOP video on voting and tallies, vote results for shopping places and restaurants, bar graph, crayons or colored pencils, pencils

Vocabulary (New or Review):

Vote; tally; count; bar graph; most; fewer; shopping; restaurant

Sequence of the Lesson:
What learning activities/strategies will you use to engage the students in the learning? What will students do to use and apply new concepts or skills (independent practice if relevant)? How will you monitor and guide their performance? Include relevant vocabulary. Use bullets to sequence your lesson.

Group 1

- Meditation.

- Expectations: I use my AAC device to find them and students use theirs.
- No warm-up today because class is shorter.
- We watch the BrainPOP video on voting and tallies.
- Students color in the bar graph to show the number of votes for each shopping place and restaurant.
- I model my AAC device throughout.

Group 2

- Meditation.
- Expectations, said aloud.
- No warm-up today because class is shorter.
- We watch the BrainPOP video on voting and tallies.
- Students count the votes for each shopping place and restaurant.
- Students make tally marks for each vote.
- Students fill out the bar graph with the amount of votes.

Closure: What will you do to bring closure to the lesson? How will you summarize this lesson and preview the lesson that will follow?

Group 1: I use my AAC device to ask which place or restaurant has the most votes, using their colored graph.
Group 2: I ask students which shopping place and restaurant got the most votes and how they know from the graph.
Connection to Next Lesson: Students use the results to plan the CBI trip for Christmas shopping and lunch.

Reflection Guidelines

The student will write lesson plans with an eye to the Danielson Framework and the Four Domains of Professional Practice. Use this as a resource when writing lesson plans.

Domain I Planning and Preparation

1. How do you know you were knowledgeable of your content?
2. What is the evidence that your objective was clear in the lesson plan?
3. How does the lesson address individual student learning needs?
4. What variety of strategies and methodologies did you consider when planning?
5. What is the evidence that lesson components were logically sequenced?
6. How did your lesson plan include checks for student understanding?
7. What PA Standards did this lesson address?

Domain II Classroom Environment

1. How did students know the behavioral and academic expectations for the lesson?
2. What effective routines and procedures did you implement for lesson efficiency?
3. How did you insure the classroom was physically accessible for all learners?
4. What evidence indicates that respect was shown between and among students and teacher?
5. What evidence indicates that students placed a high value on quality participation, process, and product?
6. How do you assess if the lesson was attainable for all students but also had appropriate rigor?

Domain III Instructional Delivery

1. How did you align your lesson to PA Standards?
2. How did you insure a clearly stated objective, understood by learners?
3. How did you provide clear explanations as to how to proceed through the lesson?
4. What questioning and discussion techniques insured all-learner participation?
5. What strategies did you employ to engage all students?
6. Describe how you made the content meaningful due to sequencing and pacing.
7. Discuss how you checked for understanding, provided feedback, retaught.
8. What is the evidence that you were you flexible and responsive to the needs of the learners?
9. Describe how you made meaning of the lesson with some form of closure activity.

Overall Assessment

Briefly state any changes you will make the next time you teach this lesson or activity, to improve any of the Domains of Professional Practice.
